OK, here's the deal. I have an IBM ThinkPad 720 mono that is collecting dust.

The package I have includes: laptop (486/50, 12/240, all ext. ports, 1.44 floppy, 2 PCMCIA slots), AC adaptor/charger, 3 extra batteries, 2 extra 160mb hard drives, 2 docking stations (both with full set of ports, SCSI-2, 2 expansion slots, 5 1/4" drive bay. One has 2x IBM SCSI CD-ROM.), external battery charger, and hardshell carry case with handles and wheels. Everything

is in excellent condition. Current value on today's used market is about $1200 for everything. Would prefer to keep package together, buyer pays shipping.

What I would be willing to trade for: cash, BC 9000xlt, 2m/70cm handheld, AOR

AR8000, PRO26, PRO2006, BC 3000XLT, digital general coverage receiver, and possibly other items. Will accept combination of above or other arrangement to equal value of laptop and accessories.

Please email offers and questions. Thanks.

7. ICOM Z1A setup for sale

Newsgroup: rec.radio.amateur.swap
Date: 1997-01-05 00:00:00 UTC
From: cward@stimpy.acofi.edu
Message-ID: <32d1f414.1423911@snews2.zippo.com>
Source record: 11021
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap

The whole setup includes the manuals.

IC-Z1A Dual band handheld w/ 4.8V battery, face detachment kit,
and fixed length antenna (FA-1443B)
IC-CP12 Cigarette lighter adapter
IC-BP173 9.6V NiCad battery
IC-BC79A Desktop rapid charger w/ AC adapter
IC-AD51 Desktop rapid charge adapter for the IC-BP173 9.6V NiCad
battery
MFJ-1712 dual band extending antenna for the Z1A
Earphone for listening to the Z1A quietly

Books:

ARRL General Class License Manual for the Radio Amateur
Now You're Talking: All You Need To Get Your First Ham Radio License

Everything is in perfect condition and was only used for 3 hours
total.
I'm selling it because I don't have time to study and get my license.
Instead, I'm going to take up photography.

I'll guarantee against DOA for 10 days. Warranty card included.

All of the above for $500.00 + shipping, obo. Terms are COD
cash/money order.

Thanks,

Curtis
cward@stimpy.acofi.edu

A while back there was someone selling replacement caps for the
MLA-2500 Power Supply. 100-150 uF @ 450 Volts.

Does anyone remember who was selling them or know of a source? I do
know that caps in this size/voltage are difficult to buy.

These are for a good friend of mine.

Any help appreciated!

I have the folling to sell as a package:
1- ICOM ICW21A (Dual Band Handheld)
Will recieve from 50mhz-999mhz
5watt,Dual Band, Battery Pack
1- ICOM SpeakerMike - W/DTMF Pad
1- ICOM Spare Battery Pack (W/Microphone in Battery)
1- ICOM/KENDOO Rapid Charger (1 Hour)
1- ICOM Case for Radio
1- 35Watt Amp/PreAMP

I have the original boxes and all the manuals. This unit is in perfect shape.
Would make a great mobile rig (giving you 35 watts of output).

$250.00 takes it all including shipping.

My mla2500 roadmap says these 5 caps have a rating of 500v. I don't know of any source of 500v electrolytics. From my own experience, 500v is really pushing the envelope for an aluminum electrolytic cap.---i.e., they don't seem to last as long as lower v rated electrolytics. I would be tempted to go to 7 400v units or to 6 450v units, using more C per unit. One source of Panasonic/Matsushita filter caps is DigiKey 1 800 344 4539. 150uF is not really enough C. I would use the largest amount of C that will fit comfortably. The Panasonic/Matsushita filter caps are of a new compact design that packs in more C per cubic inch, so you should be able to get more C and have room for the extra one or two capacitors. The new cap. arrangement can be mounted on a 1/8"-t acrylic sheet rectangle---covering the original cap. mtg. arrangement. Electrolytic caps can be easily mounted on the acrylic, sheet upside down with silicone rubber adhesive/sealant. Allow a mm or two between caps for air circulation. The equalizer resistors can go directly across the capacitor terminals. Since heat rises, that way the caps. don't get roasted by the equalizer resistors. Also, the carbon-comp. equalizer resistors Dentron (Dennis Haad) used are not stable. They should be replaced with Matsushita 100k ohm 3w mof resistors, which are also sold by DigiKey.

:>My mla2500 roadmap says these 5 caps have a rating of 500v. I don't know
:>of any source of 500v electrolytics.

The MLA-2500 has had several values of filter capacitors over time.

My original schematic shows the six (6) power supply filter capacitors
as
150 uF at 450 Volts. At some time there was a note in the parts list
changing the capacitor values to 100 uF at 500 volts. My spare parts
stock contains a couple of Mallory FP-155, 125 uF at 450 volt
capacitors,
that were left over from a "minimum quantity" purchase when I had to
replace the caps several years ago.

In any case, since the MLA-2500 uses a voltage doubler power supply, any
redesigned filter band will require an EVEN number of capacitors ... six
or eight, not five or seven.

I found something similar from an installation electrician locally...
We have them over here in some of our switching stations for the 3
phase supply to the factory, maybe try someone whos with the local
power co.?

Hello:

I have the following items that I no longer need and are gathering
dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH
3.5" and 5.25" HD disks
and comes with the full documentation (a VERY big book!).
While this will NOT compile
NOS without some major changes to the source code, it can
compile many other programs
and be used by someone who wants to learn C or C++
programming. Has a very nice DOS
developer's environment.

Sells new for $90.00

Your price: $45.00 obo

2) Borland C++ For Windows, DOS, and Win32 v 4.50: This is a complete
install on CD-ROM. All
documentation is on the CD-ROM. This WILL compile all NOS
variants!! Comes with full
debugging and optimizing functions. Also supports ANSI C. May
be only partially
installed to the hard drive to save space if needed. This is a
VERY nice package and
is intended for professional programmers.

Sells new for $300.00

Your price: $65.00 obo

3) Borland C++ For Windows, DOS, and Win32 v 4.51: This is a complete
install on 28 (!) 3.5"
HD disks. Fixes a very minor bug in v 4.50 (I never saw it
come up!). Must be FULLY
installed to the hard drive (needs almost 100 megs). Is
otherwise identical to #2
above.

Sells new for $300.00

Your Price: $65.00 obo

4) Info Magic Linux CD Set: This a VERY complete Linux package and
includes full installs for:

Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has
XFree86, full HOWTO set, and
much, much more. This is a >6< CD-ROM set! Not that the CD
case itself is damaged, but
the CDs themselves are just fine. There are many Ham packages
(mostly packet) that run
under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $35.00 obo

```
*****************************************
* SPECIAL ONE FOR ALL DEAL: *
*---------------------------------------*
* Take all 4 items for only $175.00 USD!!! *
*****************************************
```

```
**********************************
* TRADERS TAKE NOTE *
**********************************
```

Those Hams wishing to trade, I am looking for the following Ham gear
(must be in good working order and complete.):

1) Any 6m FM or SSB xcvr. Tube or solid state OK.
2) Any 2m FM or SSB xcvr. Tube or solid state OK.
3) Just about any packet gear... TNCs, radios, what-ever. I am
especially looking for an SCC
type card.
4) Any 2m hand held with good battery.
5) Let me know what you have! Please note that I have no interest in
HF gear.

```
**********************
* SPECIAL NOTES *
**********************
```

1) Due to export restrictions, the above may be sold only to US
citizens and shipped only to US
addresses.
2) All prices include shipping by my choice of carriers.
3) I prefer to sell as a package and package offers will take
precidence.
4) I prefer to trade the items and trade offers will take precidece.

If interested in any of the above items, please contact me via packet
or E-Mail at the addresses below. Please include your name, packet
and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

When did they put export restrictions on developement tools? I can buy
such products from the US by mail, and have. Did I miss something?

Actually, I think the labels I've seen allow shipment to Canadian, as well as US, addresses. OTOH, shipment to Mexico would not be allowed.

I'm not sure why this policy exists, but I've seen a label to that effect on both Borland and Microsoft products. I've also bought at least one piece of software that had both US and Canadian registration cards, with the appropriate prepaid postage.

Both of these vendors sell multi-lingual versions of their products, as can be seen during the setup procedure.

Could it be as simple as insuring that the appropriate printed materials are included, for shipment to other countries?

There is/was a ban on exporting *technology* to certain countries such as the former Soviet Union, which included both computers and software. But I *think* exports are even allowed to Taiwan, even with the problem of open software piracy there.

Actually, you are probably right, Jim. All of the above products
(excepting the Linux set) are labled "For US Sale Only".

I would rather stick to the sure bets. No sense in getting Janet any
more upset than she already is!! :)

That may well be. Microsoft created quite a stir here in Canada when
they held back the french release of Windows95 in Quebec so they could
make packaging differences from that sold in France so that it
couldn't be grey marketed. That could very well be the reason here. I
hadn[t thought of that :)

Yep. Especially "crypto" tech. As if other countries don't already
have as good a system (or the same one). :))

31. For Sale: SHORTWAVE RECIEVER YEASU FRG-100

Newsgroup: rec.radio.amateur.swap
Date: 1997-02-13 00:00:00 UTC
From: saturn@interlog.com
Message-ID: <330577fc.4124620@news.interlog.com>
Source record: 11045
Cross-posted to: tor.forsale.misc,tor.forsale,ont.forsale,ont.for-Sale,rec.radio.amateur.swap,rec.radio.shortwave

I have a FRG-100 for sale. Like new. 100% in working order.

Included in this unit there is:
- FM module. ($100 value)
- Home made CAT unit to enable a PC to control radio. (Store bought would cost over $100)
- Manual
- Radio alone in Canada is selling for $950 before taxes.

I'm asking $700 Canadian, or the best offer. Need to sell because I'm moving to a transceiver(Ham).

Please contact me via e-mail.
saturn@interlog.com

Below you will find more detail about this unit.

FRG-100 COMMUNICATIONS RECEIVER

Winning the prestigious 1992 World Radio TV handbook award for "Best Communications Receiver" when introduced is reason enough to make
the FRG-100 your receiver. And if that's not enough, consider its industry-exclusive features like adjustable SSB carrier offset and user selectable 10 Hz, 100 Hz or 1 KHz tuning steps. Or the exciting broadcast band mode with 16 pre-programmed international broadcast
bands. Even 50 memory channels and twin 12/24 hour clocks to keep you tuned in where and when you are - day or night. Additional standard
features such as selectable AGC, noise blanker, all mode squelch, and RF attenuation provide the operator with the controls required for
noisy and crowded band conditions. Join the experts and make the FRG-100 your "best communications receiver", too.

FRG-100 FEATURES

- Frequency coverage 50 KHz through 30 MHz.
- 50 Memory channels store frequency, mode and filter selection, (all memories are freely tunable).
- Two special memories store user programmable band edges for scanning.
- Multi-function scanning, (memory, band, selectable group, priority)
with carrier or time-delay resume modes.

- Adjustable BFO, reverse BFO offset, and selectable CW sideband.
- Adjustable SSB carrier offset permits tailoring the receiver's audio response to your own taste.
- Front panel selactable AGC rate.
- Front panel selectable attenuator.
- Front panel selectable noise blanker.
- Front panel selectable backlighting.
- Twin 12/24 hour clocks.
- Alarm and timer functions.
- User selectable bandwidths.
- CAT port for PC control.
- Dual antenna jacks (Coax and Open Wire).
- 12 VDC power allows operating flexibility.

The Arizona Audiophile Society, a not for profit organization dedicated to promoting the best in home audio and video reproduction, presents its 7th annual Audio Equipment Swap meet.

This years meet will be held in the parking lot of Arizona Tube Audio, 688 W. 1st Street, Tempe, Az., on Saturday March 1st, 1997, from 9 Am to 3 Pm.

This is a great opportunity to buy, sell or trade high quality High End Audio equipment, often at a fraction of its original retail price.

For information on reserving a space or table to sell at the event, or for more information about the meet, or joining the Arizona Audiophile Society, please call our new automated answering service at (602) 417-0223, or Fax your request to (602) 251-2382. A society representative will get back to you with event registration and membership information.

For an informative brochure, and directions to the swap meet , please log on to http://www.netzone.com/~vander/swap

Ben, A few months ago I was looking into the MARS and the only way that I found out about it was by jumping on the internet and typing in "MARS" and that took me right there. It would even tell you who the regional person was for where you lived. I will see if I can find the address for you.

Good luck 73's,
Jay Tombre N7ZHL

I've had fun with the thread that's come since posting this rig, but I'm starting to get a little tired of Nutless Idiots such as yourself, littering up the newsgroups and destroying other people's ads. It's okay though, because I have a growing list of boneheads I'm going to be watching very closely for. I'm actually quite anxious to see YOUR next attempt to sell an item. I assure you that there will be more attention drawn to the outlandish prices instead of the equipment you've posted.

Have a fine evening,

Mike

I am looking for a GE MASTR Exec II VHF (132-174 MHz). Or at least I think that's the one. I have several of what I believe to be Exec I's with the tube multipliers and final. I want to use the transmitter from one of these but cannot use the one with tubes. I believe the Exec II is all solid state.

Actually, all I need is the multiplier and final stages (I am presuming it uses the same FM generator board (4EG21F10 or similar) as the ones I have. If someone has yanked just these from a unit, that would be fine.

Please Email me if you have these parts.

Paul, N1BUG

66. FS: 2 - Heathkit WX stn's

Newsgroup: rec.radio.amateur.swap
Date: 1997-02-25 00:00:00 UTC
From: Michael Kassay <mkassay@sympatico.ca>
Message-ID: <3313DF0D.6329@sympatico.ca>
Source record: 11080
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,sci.geo.meteorology

FOR SALE:
2 - Heathkit ID-5001 Weather Stations !

The first unit is an UNBUILT kit - The kit does have a few minor parts missing, nothing too expensive that couldnt be purchased from a local electronic shop.

The second unit is a complete working unit with out external sensors.

Combine the two units to have one complete system, or obtain the missing sensors and have 2 COMPLETE units!
A single ID-5001 unit is presently being sold for $1495 U.S. plus tax..fr Questech. in OHIO.

These 2 RARE units will only be sold as a package, complete with manuals.(one set)

Reason for selling? Insanity? To be honest, Im moving and need the bucks, otherwise they would never be leaving my shack.

Im open for serious offers...

Thks

67. FS: UHF Repeaters

Newsgroup: rec.radio.amateur.swap
Date: 1997-02-25 00:00:00 UTC
From: Jim & Joyce Ross <jarjwr@xpressweb.com>
Message-ID: <33137007.E99@xpressweb.com>
Source record: 11081
Cross-posted to: rec.radio.swap,misc.forsale.non-computer,rec.radio.amateur.equipment,rec.radio.amateur.swap

I have two UHF repeaters for sale. One is built from a Motorola Micor and runs 25 watts out. It is crystaled for 449.850 Tx and 444.85 Rx. It has a microcomputer controller with 14 DTMF commands, voice ID and other voice messages. You can see some pictures of this repeater at URL: http://www.xpressweb.com/~jarjwr/ The power supply is heavy duty and all the system works very well.
The other repeater is an RCA unit comverted for 449.80 Tx and 444.80 Rx. It runs about 15 watts out and also has a microprocessor controller. It has a DTMF decoder and Wav-Com duplexers. The Radio is a class act as it is a regular blue RCA case with locking doors. I will sell either or both repeaters for $450 each. These units were converted by myself and my background is an electronic eng with many years of UHF and microwave design experience. If you don't beleve me just ck my spelling. Hi. These units must be for pickup only in Kanab, UT. 3miles North of the AZ boarder. Thanks for reading and eMail me if I can answer any questions.

Hey folks, get over this spamming the newsgroup thing. Your even
sending them to the commercial group. the send to line that follows
this article is longer than the winter day. GET OVER IT and watch were
you send your replies to. I am a ham too, but this is getting
rediculus sending replies where they have no purpose.

Getting off my soap box now ... thank you

I have a Generic Brand Laptop for sale. It's a 386SX/25 w/1meg ram, 80meg h/d, VGA monochrome monitor and a case to carry it in.
The plug in the back broke, so I rewired another plug which works fine with the power supply I have for it. I also have the same plug connector attached to the car cord I made for running it in your vehicle. Great for portable packet, DX loggings, tracking satellites like I do and any other thing you can think of to use this hand tool.

Asking price is $300 obo and I'll pay the shipping.

You can e-mail me if you need any further info, or leave your number and I'll be more than happy to call you back. If you want to call me, you can anyday but Sunday between the hours of 4pm and 8pm pacific time. 702-453-0821

Thanks all, awaiting reply.

Mel,

I dont have one, but you might pass a note along to Jim Moore WU3V (jim@usl.edu) and see if he's heard of anything. Jim runs the Packet Cluster down in Abbeville, La. and there's usually messages like that floating along there. Tell him I sent ya, and maybe he'll pass along access to the Net side of his gateway and letcha read the messages on his cluster.

Good luck

Hello!

I recently picked up a used Kenwood TH-25AT that didn't come with a user oepration manual. I tried to get one from Kenwood, but they report that the manual has been discontinued and is out of stock.

Could anyone photocopy their manual for me and send it to me? I'll be happy to cover copying and postage costs. Please respond to me at paul@conterra.com.

Thanks!!

Paul Selig KF4TRC

93. Wanted: old Regency service manuals

96. For Sale: SHORTWAVE RECIEVER YEASU FRG-100

Newsgroup: rec.radio.amateur.swap
Date: 1997-03-25 00:00:00 UTC
From: saturn@interlog.com
Message-ID: <33373194.191218@news.interlog.com>
Source record: 10963
Cross-posted to: tor.forsale.misc,tor.forsale,ont.forsale,ont.for-Sale,rec.radio.amateur.swap,rec.radio.shortwave

I have a FRG-100 for sale. Like new. 100% in working order.

Included in this unit there is:
- FM module. ($100 value)
- Home made CAT unit to enable a PC to control radio. (Store bought would cost over $100)
- Manual
- Radio alone in Canada is selling for $950 before taxes.

I'm asking $700 Canadian, or the best offer. Need to sell because I've moved to a transceiver(Ham).

Please contact me via e-mail.
saturn@interlog.com

Below you will find more detail about this unit.

FRG-100 COMMUNICATIONS RECEIVER

Winning the prestigious 1992 World Radio TV handbook award for "Best Communications Receiver" when introduced is reason enough to make
the FRG-100 your receiver. And if that's not enough, consider its industry-exclusive features like adjustable SSB carrier offset and user selectable 10 Hz, 100 Hz or 1 KHz tuning steps. Or the exciting broadcast band mode with 16 pre-programmed international broadcast
bands. Even 50 memory channels and twin 12/24 hour clocks to keep you tuned in where and when you are - day or night. Additional standard
features such as selectable AGC, noise blanker, all mode squelch, and RF attenuation provide the operator with the controls required for
noisy and crowded band conditions. Join the experts and make the FRG-100 your "best communications receiver", too.

FRG-100 FEATURES

- Frequency coverage 50 KHz through 30 MHz.
- 50 Memory channels store frequency, mode and filter selection, (all memories are freely tunable).
- Two special memories store user programmable band edges for scanning.
- Multi-function scanning, (memory, band, selectable group, priority)
with carrier or time-delay resume modes.

- Adjustable BFO, reverse BFO offset, and selectable CW sideband.
- Adjustable SSB carrier offset permits tailoring the receiver's audio response to your own taste.
- Front panel selactable AGC rate.
- Front panel selectable attenuator.
- Front panel selectable noise blanker.
- Front panel selectable backlighting.
- Twin 12/24 hour clocks.
- Alarm and timer functions.
- User selectable bandwidths.
- CAT port for PC control.
- Dual antenna jacks (Coax and Open Wire).
- 12 VDC power allows operating flexibility.

I have an Icom R71a communications reciever with Pass-band tuning that is in MINT condition for sale. The radio has the FL44A crystal SSB filter installed and also comes with an inline coaxial static arrestor, a Datong indoor-outdoor active dipole antennae(never seen outdoor use), and an Alpha-Delta DX-SWL outdoor sloper antennae. I see that Atlantic Ham still wants $1000 for this rig without the SSB filter. I'll sell mine, with the filter and antennaes for $750.00 firm. If interested you can e-mail me at zoom@sympatico.ca
Thankyou

Howdy Matt -- you can find the info you want at the ARRL Hamfest/Convention Page at URL:
http://p1k.arrl.org/hamfests.html

Saw several there for the Wisconsin area.

If you go to ARRL's home page on the internet there is a list of all
hamfests in the USA for the entire year.

================================================================================
Motorola Radios & Accessories (see below for more info)

$400 shipped for the lot

qty 1 HT50 154.6 MHz
qty 4 HT90 154.6 MHz
qty 3 HT90 154.57 MHz
several partially assembled HT90s and HT50s

qty 1 NTN4864B charger
qty 6 NLN7646A charger
qty 6 NTN4864A charger

qty 14 NLN7434A & similar batteries
qty 1 NTN5453A battery

qty 13 BNC whip antennas various lengths
qty 1 HT50 screw in antenna

I would like to sell all this together if possible. The chargers are in
decent cosmetic shape, some have marker writing on the front. The radios
are somewhat more beat up. All of the radios were used for data
transmission, all have had the accessory jack removed. Some have a short
coiled cord with a strange connector in place of the jack, some have
nothing at all here. I have tried most of them, however, and they all
seem to function anyway. The condition of most of the batteries is
unknown; I charged up a few to test the radios, that's it. Because of
the condition of this equipment, I offer no guarantees on it.
================================================================================
HP 1222A Oscilloscope $100 shipped

Not working, possible problem with sweep generator. When you press
the beam find button, you can see the beam sitting there in the
middle.

power supply! May fit other compact Macs as well.
==========
Rolodex Hand Held Organizer Model K32/EL3132 $30 shipped

Personal hand held organizer, store phone numbers, schedule,
calender, calculator. Infra-red link for dumping to PC. 32K
memory. Original box, manual, unknown condition.
==========
Beyond Zork $10 shipped

A cool Infocom game for Macintosh. Includes original box,
manuals and floppy.
==========
Red Hat Software Linux Library CD 1995 $15 shipped
==========
Misc SIMMs $25 shipped for the lot

30-pin 256K 120ns SIMM (8 chip) qty 4
Original Apple brand SIMMS from a Mac Plus

30-pin 256K 80ns SIMM (2 chip) qty 8 work in Macs, not PCs
Macmemory Max-Plus SIMM converter
Converts 4 30-pin 256K SIMMs into 1 30-pin 1MB SIMM. Worked in
a Mac Plus (a tight fit though), probably work in most older macs.

113. FS or FT -- Toshiba Laptop

Newsgroup: rec.radio.amateur.swap
Date: 1997-04-07 00:00:00 UTC
From: mdwatt@usit.net
Message-ID: <334bf593.193967193@news.usit.net>
Source record: 10980
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.swap,rec.radio.amateur.equipment

I have a T1900 Toshiba laptop for sale or trade. 486/20, 4 meg ram,
200MB hd (doublespaced to 385MB), monochrome VGA, quickport
trackball pointing device, 14.4 PCMCIA fax/modem, briefcase style
carrying case.

Charging circuit is going out -- will boot from charged batteries,
but not from AC/DC adapter. After booting, AC/DC adapter can be
used. Won't charge batteries.

All for $300 plus shipping, as is, or would prefer trade for
Oscilloscope, >40MHz dual trace, with 1x/10x probe. Multi-band QRP
equipment also considered.

E-mail interest only, please. Snail address is no good in Callbook,
and I have no phone in my name.

If trade, we'll each ship our own stuff.

Is the YAESU 1000MP a gud radio? I have opportunity to a buy mint used
one. What is it worth? What is a fair price to pay?
Is it inferior to the 1000d, or better?
I know it has less power, but otherwise, please comment.......?

Thanks,
Rick

The Heil and the Shure/Swan are spoken for ...

Telex is only thing left! They are moving quickly! The Telex is
like-new condition (with connectors attached, 1/4" mono for mic and
1/8" stereo for phones). Even has the ear covers, not even dirty!

Hello:

I have the following items that I no longer need and are gathering
dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH
3.5" and 5.25" HD disks
and comes with the full documentation (a VERY big book!).
While this will NOT compile
NOS without some major changes to the source code, it can
compile many other programs
and be used by someone who wants to learn C or C++
programming. Has a very nice DOS
developer's environment.

Sells new for $90.00

Your price: $45.00 obo

2) Borland C++ For Windows, DOS, and Win32 v 4.51: This is a complete
install on 28 (!) 3.5"
HD disks. Fixes a very minor bug in v 4.50 (I never saw it
come up!). Must be FULLY
installed to the hard drive (needs almost 100 megs). Is
otherwise identical to #2
above.

Sells new for $300.00

Your Price: $65.00 obo

3) Info Magic Linux CD Set: This a VERY complete Linux package and
includes full installs for:
Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has
XFree86, full HOWTO set, and
much, much more. This is a >6< CD-ROM set! Not that the CD
case itself is damaged, but
the CDs themselves are just fine. There are many Ham packages
(mostly packet) that run
under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $35.00 obo

****
* SPECIAL ONE FOR ALL DEAL: *

--
* Take all 3 items for only $125.00 USD!!! *
****

****
* TRADERS TAKE NOTE *
****

Those Hams wishing to trade, I am looking for the following Ham gear
(must be in good working order and complete.):

1) Any 6m FM or SSB xcvr. Tube or solid state OK.
2) Any 2m FM or SSB xcvr. Tube or solid state OK.
3) Just about any packet gear... TNCs, radios, what-ever. I am
especially looking for an SCC
type card.
4) Any 2m hand held with good battery.
5) Let me know what you have! Please note that I have no interest in
HF gear.

****
* SPECIAL NOTES *
****

1) Due to export restrictions, the above may be sold only to US
citizens and shipped only to US
addresses.
2) All prices include shipping by my choice of carriers.
3) I prefer to sell as a package and package offers will take
precidence.
4) I prefer to trade the items and trade offers will take precidece.

If interested in any of the above items, please contact me via packet
or E-Mail at the addresses below. Please include your name, packet
and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

Don't forget to check back often with the Northwest Saturday Morning Swap Net Page. This is the website for an "on the air" net that takes place every Saturday morning, and (conditions permitting) covers most of the Northwest U.S. The new listings are usually posted by 1PM Pacific time on Saturday afternoon. We also take listing from around the country (no commercial types) from the internet, and read them on the air durring the net.

You can check it out at: http://www.chatlink.com/~rickt/swap.htm

Thanks,

Ron

The value of anything is subjective. I would let my 2006 go for $400
since I cant replace it. They dont make them like that anymore.

134. FS or FT: HF Mobile equipment

Newsgroup: rec.radio.amateur.swap

PLEASE SPREAD THE WORD ON THIS TO ANYBODY THAT YOU THINK MIGHT BE INTERESTED.

Ham gear, test equipment and electronic parts from the estate of John Gruss, W1ACR will be sold at a tag sale on Saturday and Sunday, April 26-27 from 10 am to 4 pm in Danbury, Connecticut (near the CT/NY border.)

The location is 20 Edgewood St., Danbury at I-84 exit 4. Turn left off of the exit ramp, and take an immediate left onto Shannon Ridge Rd. Go past the stop sign to the 2nd house on the right.

There is literally tons of equipment and parts, and EVERYTHING MUST GO! Come on out for some great deals. For additional information, contact Brian Gruss, N1IXI, (203) 743 0914.

rec.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.info,rec.radio.amateur.swap

I purchased a Yaesu FT-416 2M handi at a hamfest yesterday. This is either the A1 or B2 version, (I don't know how to find out), with a TX/RX of 144-148Mhz.

What I would like to do is mod the radio to RX from 130-174. (match the A2 version) I know this is possible, but don't know how.

One note: I DON'T want to TX out of band, just RX. However, I am sure that any mods will affect both.

If anyone can help me, please contact me.

I am VERY unfamiliar with the newsgroups and how they operate; so it might be better if any responses are directed to mstaff@enhcom.com

Thanks to all, and 73!

*****************************************
*PRICES REDUCED 01 MAY 1997!!*
*****************************************

Hello:

I have the following items that I no longer need and are gathering
dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH
3.5" and 5.25" HD disks
and comes with the full documentation (a VERY big book!).
While this will NOT compile
NOS without some major changes to the source code, it can
compile many other programs
and be used by someone who wants to learn C or C++
programming. Has a very nice DOS
developer's environment.

Sells new for $90.00

WAS: $45.00 obo

NOW: $35.00 obo

2) Borland C++ For Windows, DOS, and Win32 v 4.51: This is a complete
install on 28 (!) 3.5"
HD disks. Fixes a very minor bug in v 4.50 (I never saw it
come up!). Must be FULLY
installed to the hard drive (needs almost 100 megs). Is
otherwise identical to #2
above.

Sells new for $300.00

WAS: $65.00 obo

NOW: $50.00 obo

3) Info Magic Linux CD Set: This a VERY complete Linux package and
includes full installs for:
Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has
XFree86, full HOWTO set, and
much, much more. This is a >6< CD-ROM set! Not that the CD
case itself is damaged, but
the CDs themselves are just fine. There are many Ham packages
(mostly packet) that run
```

under Linux with many more being added all the time.

Sells new for $50.00

WAS: $35.00 obo

NOW: $25.00 obo

```
*****************************************
* SPECIAL ONE FOR ALL DEAL: *
*---------------------------------------*
* Take all 3 items for only $100.00 USD!!! *
*****************************************
```

```
**********************************
* TRADERS TAKE NOTE *
**********************************
```

Those Hams wishing to trade, I am looking for the following Ham gear (must be in good working order and complete.):

1) Any 6m FM or SSB xcvr. Tube or solid state OK.
2) Any 2m FM or SSB xcvr. Tube or solid state OK.
3) Just about any packet gear... TNCs, radios, what-ever. I am especially looking for an SCC
type card.
4) Any hand held with good battery.
5) Let me know what you have! Please note that I have no interest in HF gear.

```
**********************
* SPECIAL NOTES *
**********************
```

1) Due to export restrictions, the above may be sold only to US citizens and shipped only to US
addresses.
2) All prices include shipping by my choice of carriers.
3) I prefer to sell as a package and package offers will take precidence.
4) I prefer to trade the items and trade offers will take precidece.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below. Please include your name, packet and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

Hi-

Im looking for a AEA ISOLOOP 10-30 prefer with a tuner.
I also if interested have a Cushcraft R-7 bought about a month before
the R7000 came out and up less that a year. Still shiny and in exclnt
condition. would prefer a trade.

Reason: Had to move to an apartment.

Thank You

Let me know.

Hello!

Well, title says _almost_ all: unit doesn't need to be perfect; I want only a complete receiver, although not working (summer project :-) ?). Cosmetics can be from about a 6. Filters are of course a plus. Same for manuals. BTW I want the receiver for use it in my shack and also enjoying its restoration.

Please, e-mail offers directly with price, condition and filters supplied.

Any other further information welcomed!.

Thanks and best regards.

Due to purchase of a new home with covenants and supposedly rfi ridden neighbors the following gear is for sale:
1. Kenwood TS140S with recently purchased MC60 Mike. I am original owner,mars modified,excellent condition. 650$ together,will not break up.
2.Ameritron AL811, 3 tuber,original owner,new Svetlanas put in at xmas,600 watts all day. 450$
3.MFJ 989C 2KW tuner,bought new at xmas,MINT. 275$
Entire package,1300$
All manuals and power cables of course. All prices you pay shipping or pickup in Atlanta,Georgia.
Terms: Items must be prepaid with certified check or money order. No cod's because UPS takes months to cut a moneyorder. I will ship immediately on receipt UPS and verify with a tracking number. Prices are firm,this a great station. Queries via e-mail Thanks KD4CDB Jim

162. FS/TRADE Olympus Camera System for Ten-Tec

Newsgroup: rec.radio.amateur.swap
Date: 1997-05-09 00:00:00 UTC
From: jschulze@jschulze.bmc.com
Message-ID: <5kvecf$bhg2@sarajevo.bmc.com>
Source record: 10934
Cross-posted to: rec.radio.swap,rec.photo.equipment.35mm,tx.forsale,rec.radio.amateur.swap

I want to trade my Olympus Camera System for your
Ten-Tec Omni V/VI or Paragon Amateur Radio + PS or sell
entire system for $1750 (negotiable) plus shipping.

I have: 2 bodies: OM2n #685xxx, OM2S #1059xxx, Winder 2 + 3m
remote release

4 nice lenses: Zuiko 35/2.8, Zuiko 100/2.8, Zuiko 135/2.8
Zuiko 50-250/5 zoom (very nice lens)

1 Zuiko 28/2.8 lens with scratched coating on front element

1 Sigma 35-70/2.8-4 (quality unknown. I never used it.)

Flashes: 1 Olympus T32, 2 Olympus T20, 3 Shoe 4,
1 Olympus AC adapter 2 for T32
1 Multi-flash adapter shoe & .3m cable

All of this equipment has been used for nature photography and has
small imperfections. I think it would all be 9 or better except
for the 28/2.8 which is probably a 8 due to the scratch.

Trade now and I will include an additional Olympus OM2S + 50/1.4
paper weight (good for parts). The shutter & film transport is jammed
from an ill fated meeting with a Heidelberg sidewalk, and the
filter ring of the lens is dented pretty good, but I guarantee it will
hold down a stack of papers through the stiffest AC breeze, and might
be good for a story or two about how you barely escaped with your life
while rock climbing in Utah...

If you want more specific details about any of it send email.

Jim, KE5GO

Does this come with any options included ie interface cable etc?
Also, this unit has an external antenna connector?

Hi,

Thanks for reading this. I bought an old Heath IB 102 digital multimeter at a fest and need a copy of the schematic and alignment instructions to get it going. Hate to junk this one, so appreciate your help.

Will be happy to pay for copying and mailing costs.

Thanks in advance,''

I need help finding a schematic for two old GE mobiles (currently used as local repeaters), especially the wiring for the control head as the controllers are about to be replaced, and the wiring of the old ones us a mess.

the numbers listed on the ID plaques are:

RG56TFS66, or N.P. 243349

and

YG56KJJ66, or N.P. 243349

They appear to be the same radios with different options.

Thanks to all,

Ron, N7TAW

The first unit sounds like an older GE Exec (not the Exec II). If I
recall, this radio may have tube finals. Not sure about the 2nd unit.

Hello:

I have the following items that I no longer need and are gathering
dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH
3.5" and 5.25" HD disks
and comes with the full documentation (a VERY big book!).
While this will NOT compile
NOS without some major changes to the source code, it can
compile many other programs
and be used by someone who wants to learn C or C++
programming. Has a very nice DOS
developer's environment.

Sells new for $90.00

WAS: $45.00 obo

NOW: $35.00 obo

2) Borland C++ For Windows, DOS, and Win32 v 4.51: This is a complete
install on 28 (!) 3.5"
HD disks. Fixes a very minor bug in v 4.50 (I never saw it
come up!). Must be FULLY
installed to the hard drive (needs almost 100 megs). Is
otherwise identical to #2
above.

Sells new for $300.00

WAS: $65.00 obo

NOW: $50.00 obo

3) Info Magic Linux CD Set: This a VERY complete Linux package and
includes full installs for:
Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has
XFree86, full HOWTO set, and
much, much more. This is a >6< CD-ROM set! Not that the CD
case itself is damaged, but
the CDs themselves are just fine. There are many Ham packages
(mostly packet) that run
```

under Linux with many more being added all the time.

Sells new for $50.00

WAS: $35.00 obo

NOW: $25.00 obo

```

Hello,
I have a ten meter band ham radio for sale. It is a mobile (CAR) radio which can be used at home also. I have a power supply/converter included in the deal. This converter can be used to setup the radio at home. The manufacture of both the radio and the power supply/converter is Radio Shack. I am asking $225.00 for the whole thing. If you are in the Miami, Florida area and are interested or you wish to discuss the shipping arrangements, please contact me at skyfire@bellsouth.net

If memory serves, what you have are GE MSTR EXEC II series...one
standard
and the other is the IMTS version....Best to use one radio as the rptr.
They are 60 watt models (the 5 in 56) and are in the 150-174 range (the
66 at the end) but they do tune to 2mtrs...
I'll see what I have in my docs on those models...
Chris

Hello -

Looking for a manual (or copy) for a Motorola (by Measurements Corporation) model S-1320 RF Signal Generator. 1970's vintage RF Sig Gen, solid state, used primarily in the commercial radio trade.

Will pay any and all costs to get the manual for my ham-fest treasure!

Thanks for reading this.

Wasn't the first unit listed an Exec I (not the Exec II) that used
tubes for the driver and final (rest of the radio is solid state)? I
used to have RG56TAS66 models on high band that were Exec I units
(from the mid to late 60s I think).

John,

These things definately have tube finals, but the club has lots of
spares and they aren't interested in replacing the rigs at this time.

The stamps on one of the boards shows a "built" date of Dec, '72, so
you're in the right ballpark.

If you happen to have any of that old literature laying around, it would
be greatly appreciated.

Thanks again,

Ron, N7TAW

This did not make cq, qst, or 73....
It is on the ARRL Hamfest web site!

This did not make it into the June Florida Skip..It will be in July Skip.
Please help spread the word...

USFREC@eng.usf.edu

Subject: USF HAMFEST Sat 7/26/97 9am-3pm

well.... if you get this and still need more info let me know.

Don't forget the SIXTH ANNUAL USF "Last Minute" HAMFEST in FLORIDA
Sat July 26th 9am to 3pm
in the ice cold air conditioning...

Hosted by the University of South Florida Radio and Electronics Club.

Admission $3.75
1st swap table $10 including ticket.
Additional tables $10 each up to 4 tables.
The 5th table and above are $15 each.
If you need more than 5 tables you must contact us!!!
In order to ensure your table reservation please pay early.
---
for table or advanced ticket sales: (must be postmarked by 7/15/97)
PLEASE SEND US A SELF ADDRESSED STAMPED ENVELOPE (SASE).

USF HAMFEST
4202 E FOWLER AVE., CTR 2416
TAMPA, FL 33620

USF is easily located on Fletcher Ave between I-75 and I-275 in Tampa.
Enter campus on North Palm Dr. follow the signs to the
USF Special Events Center. (CTR)

Just close enough to Busch Gardens to let the family go there while you play!

TESTING WILL TAKE PLACE AT 11AM.

TALK IN 146.94-
Vendors may setup FRI NIGHT 6-9pm and SAT MORN 8-9am.

SEE YOU THERE!!!!

for more info, direct questions to: USFREC@eng.usf.edu

OR WATCH http://www.eng.usf.edu/studorgs/radio

or call the club at: 813-974-2253

We are committed to making sure that this hamfest is affordable to the average ham... We have kept our admission and table prices the same for several years.

Our only increase this year is for folks that buy 5 tables or more (from $10 to $15). As I am sure you can understand our costs went up. This will generally affect only larger vendors or folks that are selling large quantities of stuff at the hamfest.

Thanks for many years of faithful support.

The USF Radio and Electronics Club

I have a little used Kenwood TH-28 144 MHz handheld for sale. It has one standard battery, two extended time high capacity batteries, an alkaline "AA" cell holder, all other original parts and the original manual. This radio also has the expanded memory module for increased storage. I will also include a Master Charger I with the cup for this radio. Excellent condition, very little transmitting, mostly receiving. This radio is currently for sale at most amateur stores and the total price for the included parts would be over $500. Asking only $300 includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

I have a Ten-Tec Argonaut 509 with both the matching power supply and the electronic keyer they sold for it for sale. Includes all manuals and original parts. This was my first radio that my father purchased for me new from a local electronics store when I got my ticket around 1976. Excellent condition, it is a very nice radio but I don't use it much anymore. The electronic keyer, while sold as a unit for the Argonaut, is all black unlike the radio and power supply which are off white with wood grain trim. Asking $375 which includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

228. => TenTec Argonaut 509 plus accs for sale

Newsgroup: rec.radio.amateur.swap
Date: 1997-06-20 00:00:00 UTC
From: tcbordp@vbbusnw1.tc.cc.va.us
Message-ID: <5oeqac$mee@usenet77.supernews.com>
Source record: 10812
Cross-posted to: rec.radio.swap,rec.ham-radio.swap,rec.radio.amateur.swap

I have a Ten-Tec Argonaut 509 with both the matching power supply and the electronic keyer they sold for it for sale. Includes all manuals and original parts. This was my first radio that my father purchased for me new from a local electronics store when I got my ticket around 1976. Excellent condition, it is a very nice radio but I don't use it much anymore. The electronic keyer, while sold as a unit for the Argonaut, is all black unlike the radio and power supply which are off white with wood grain trim. Asking $375 which includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

I have a little used Kenwood TH-28 144 MHz handheld for sale. It has one standard battery, two extended time high capacity batteries, an alkaline "AA" cell holder, all other original parts and the original manual. This radio also has the expanded memory module for increased storage. I will also include a Master Charger I with the cup for this radio. Excellent condition, very little transmitting, mostly receiving. This radio is currently for sale at most amateur stores and the total price for the included parts would be over $500. Asking only $300 includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

Hello:

I have the following items that I no longer need and are gathering dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Sells new for $90.00

Your price: $35.00 obo

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $20.00 obo

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $65.00 obo

4) Azden PCS3000 2m mobile radio. This radio was bought used by me and has been used on packet. Original remote control mic is missing but it has a Yeasu mic that works for the PTT and mic. Needs new memory battery. Works very good. Has PL tone, 8 memories, scan functions, and more. I have the manual. No mobile bracket. This is a "remotable" rig... The control head can be removed from the radio body and the body placed somewhere else and just the small control head in the car cabin. I don't have the cable, but it looks like it would be easy to make one.

Your Price: $75.00 obo

```

Hello -

Looking for manual or copy for Motorola (manufactured
by Measurements Corp) RF Signal Generator model
S-1320. This generator is the transistorized version
which resembles the older tube model T-1034. The
sig gen would be usually used in the commercial
two way radio trade.

Will pay any and all costs for copying, or will copy
and return at your pleasure. Please check your file
cabinets, and help me get my swap meet treasure
back on the air!

Thanks for reading this.

::::: DENTRON AT-1K ANTENNA TUNER :::::

SPECIFICATIONS:

Power Handling: 1200 w PEP input, 1 KW CW input

Metering: Relative forward power + SWR

Antenna Switching: Coaxial cable (50 / 75 ohm)
Random wire
Balanced output (ext balun)
Bypass (tuner out of circuit)
Alt (coax to 2nd ant or dummy load)

Dimensions: 3.75" H X 10" W X 9.5" D

Weight: 7 pounds

Color: Black steel case with white lettering

This unit is in absolutely perfect condition. 100% original. No mods.
No scratches. No stains. Absolutely NO arc-overs or flash-overs from
excessive power input.

This unit was manufactured in the mid-70s, and is one of the last
affordable REAL antenna tuners. In other words, it is ruggedly
constructed and built to last.

E-mail if you need additional information.

PRICE: $110 (I pay UPS / RPS shipping)

If you have a JC Penney outlet store nearby, you can get a real
bargain on these scanners. I've seen several in the store in Atlanta
going for between $129 and $149.

242. FS: Yaesu FT-890AT & mobile/base accessories!

Newsgroup: rec.radio.amateur.swap
Date: 1997-06-29 00:00:00 UTC
From: "Michael Conner, KQ3P" <mconner2@utk.edu>
Message-ID: <33B71F2C.138C@utk.edu>
Source record: 10825
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.amateur.misc,rec.radio.amateur.antenna,rec.radio.amateur,rec.ham-radio.swap

FOR SALE:

YAESU FT-890AT in excellent condition. Has built-in antenna tuner
(great for mobile use), built-in cw keyer, 100 Watts output, general
coverage receiver, and all mode transmitter. Comes with hand-held mic.
Still have original box and owner's manual. I always found this rig to
have a really great receiver.

Also for sale:

YAESU YS-60 SWR + Power meter (matching color to 890)
ASTRON RS-50M (with meters) (barely used)
BENCHER BY-1 Keyer (barely used)
HUSTLER Mobile resonators for:
80, 75, 40, 30, 20, 17, 15, 12 and 10 meters (low power models)
AND two masts - one stainless steel and other is fiberglass covered.
Also have a mast mount for base use.
(all resonators in good condition and worked well for mobile and base!)

and I'll throw in a 75' length of 9913 coax (no connectors).

Prices dependent on who pays shipping, but figuring:

FT-890AT $750
YS-60 $ 70
RS-50M $175
BY-1 $ 60
Hustler $150 for all including masts.

Would prefer to sell entire package. Am selling because work hours are
too long and I don't travel any more and the cash would be useful.

Please e-mail me for further details, or call in the afternoons at work:
(423) 974-0123.

Thank you!

The radio works fine when powered from 12-14 V, and charges the batteries too. To connect to a standalone 12 V battery, or a regulated power supply, you can use the Yaesu E-DC-6 external DC cord. But if you're going to use it in the car with the engine running, you're supposed to use the E-DC-5B cigarette lighter adapter instead - it has an internal filter circuit.

Hello:

I have the following items that I no longer need and are gathering
dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH
3.5" and 5.25" HD disks and comes with the full documentation (a VERY
big book!). While this will NOT compile NOS without some major changes
to the source code, it can compile many other programs and be used by
someone who wants to learn C or C++ programming. Has a very nice DOS
developer's environment.

Sells new for $90.00

Your price: $25.00 obo

2) Info Magic Linux CD Set: This a VERY complete Linux package and
includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4
and more. Has XFree86, full HOWTO set, and much, much more. This is a
>6< CD-ROM set! Not that the CD case itself is damaged, but the CDs
themselves are just fine. There are many Ham packages (mostly packet)
that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $20.00 obo

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was
my old PBBS machine and was removed from service to be replaced with a
newer, faster board. Works great, I just have no use for it any
longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $45.00 obo

```
*****************************************
* SPECIAL ONE FOR ALL DEAL: *
*---------------------------------------*
* Take all 4 items for only $75.00 USD!!! *
*****************************************

*********************
* SPECIAL NOTES *
*********************
```

1) All prices include shipping by my choice of carriers to the US and Canada. Shipping to other places or by special means will be added at cost.
2) I prefer to sell as a package and package offers will take precidence.
3) All prices in USD. Payment by money order, certified check, or person check OK. Personal checks will be held until they clear the banks.
4) Your E-Mail or Packet note will hold the items for up to 1 week while I wait for payment to arrive.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below. Please include your name, packet and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

257. HELP: Need Info on Alliance HD-73 rotor FAST

Newsgroup: rec.radio.amateur.swap
Date: 1997-07-14 00:00:00 UTC
From: gtk@*NOSPAM*mis.haselow.com
Message-ID: <gtk-1407971149070001@gkopp.haselow.com>
Source record: 10840
Cross-posted to: rec.ham-radio,rec.ham-radio.swap,rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap,alt.ham-radio.hf

When replying to this message, please send e-mail directly, BUT, you must first remove the *NOSPAN* from my e-mail address above. I'm tired of learning how to earn $50,000 in a month! :)

I need information on an Alliance HD-73. I bought one a couple weeks ago, but the previous owner was unablt to locate the paperwork. If you have a manual, I'd be glad to pay for a copy. But I really need to know a few things:

What is it worth? (Did I get ripped off?)

What are the specifications of the rotor?
Maximum weight, wind load, torque, etc.

I MAY be putting this thing under my HF antenna this weekend and would certainly appreciate it if I can avoid making a mistake.

Greg N8JMS

--
Replying to this message WILL NOT WORK. Remove "*NOSPAM*" from the address above if you wish to send e-mail.

Greg

I am looking for help selecting a new rig, I am just starting out in this hobby and am looking for a transeiver with 6M and 2M (any additional wouldn't hurt) or an HF w/ 6M and 2M. I am looking to spend about $1,000 for my entire setup, at the moment I am looking at the Icom IC-706MKII, it is a HF+6M+2M, a little more than I wanted to spend but will if it is all I can find.

If you can help me or give me some info (antenna info as well) please send me e-mail at: Matth@netacc.net, or at lease forward a copy to my e-mail, thanks in advance!!!

Matt

From the HD-73 Owner's Manual:

The HD-73-1 has the heaviest pitch gear teeth (steel hardened) of any rotator in its size and price range.

The HD-73-1 control unit features TWO-SPEED rotation with one five-position switch. This presents a one revolu-
tion per minute speed for rotating over an extended are and a slower speed for adjustment of, say, several degrees one way or the other for fine adjustments for the best signal on receiving and transmitting.

The rotator not only has a readily accessible externally located fuse for total unit protection, it also has an internally mounted automatic reset thermal protector for the motor and transformer against shorts or possible connection error or prolonged operation.

A large, back-illuminated 3 1/2" Jewell D'Arsonval, Taut Band, linear, full scale 100&#65533; swing, meter is calibrated in bold S-W-N-E-S as well as a degree-graduated scale.

The meter direction indicating voltage supply is solid state voltage regulated for meter indication accuracy regardless of wide line voltage or load variation; the regulating range is 105 to 129 volts.

The HD-73-1 rotor was designed to operate antennas with a maximum of 10.7 square feet of wind load area when properly installed.

Diameter of rotator unit -- 8".
Mast mounting size range -- 1-3/8" O.D. to 2-1/2" O.D.
Mounting option -- in tower (preferred), or on tower or mast.
Cable -- 6 conductor.
Voltage input -- 117 volts A.C., 60 hertz, + 12 volts.
Rotator weight (bare) -- 6-3/4 lbs.
Rotator with 1 pair antenna brackets -- 9-1/8 lbs.
Rotator with 2 pair brackets -- 11-1/2 lbs.
Shipping weight -- 17 lbs.
Rotator speed -- Dual -- 1 R.P.M. and a pinpoint slower speed.
Motor -- capacitor split phase, reversible. Motor voltage -- 20 volts A.C. No voltage on motor or leads exceeds U.L. safety limits.
Transformer, power -- Double protected -- fuse and thermal protectors.
Meter -- D.C. D'Arsonval, taut band. Meter scale -- S.W.N.E.S. and degree scale.

WIND LOAD INFORMATION

Severe installation and duty requirements are placed upon antenna rotors and supports by communication antenna arrays. The factors involved in such installations have been under investigation for many years to determine the effect of such requirements on antenna rotators, and how to design and manufacture rotators that will support and operate antennas under the very adverse conditions that exist in some localities. These locations are not only those of high wind velocity but also those of additional ice loading and severe conditions that exist during periods of blizzard and peak gusts of wind that occur in many areas.

The Unites States Weather Bureau furnished fastest mile per hour velocity figures from many recording stations around the United States. Measurements have been made of the relationship of gusts for fastest miles per hour data by the Bureau showing that gusts exceed fastest wind velocity data generally by 30%.

As a result of the above, the Electronic Industry Association (EIA) has recommended a wind loading standard of 30#/sq. ft. of projected surface for the purpose of design by United States manufacturers. This corresponds to a wind velocity of 110 mph. The use of this standard in design procedures will consistently yield products better able to withstand successfully most prevailing wind conditions in the U.S.A.

This brings us to the subject of Bending Moment, also called Side Thrust Overturning. Wind loading or wind pressure acting on an antenna, rotator and tower are essentially the

same as those acting on buildings, water towers
and other structures. Wind loading is by far the most critical and
severe item to be considered for antennas, rotators
and tower life. A typical 3 element vertical C.B. antenna creates a
bending moment of 1700 lb. ft. and necessitates
in-tower mounting. Other C.B. antennas are vertically polarized and
can exceed these values.

I have 2 Kenwood TK-340 hand held radios. Looking for information on them. They currently on a repeater but I don't know who's. I just bought these at a pawn shop and have 2 weeks to decide if to keep them.

Info I am looking for:

What freq range are these: My guess is 440-470

Watts:

What is this booster-pac (cig lighter on one side - AC DC converter on the other)

What type of accessories are available and where.

THANKS VERY MUCH

Probably something to do with your reader? (Guess set up to not show previously read messages?) I picked up your FS message posted on the 19th this morning (the 21st). Good luck selling your equipment. I think the FS memo is being circulated.

Hello:

I have the following items that I no longer need and are gathering
dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH
3.5" and 5.25" HD disks and comes with the full documentation (a VERY
big book!). While this will NOT compile NOS without some major changes
to the source code, it can compile many other programs and be used by
someone who wants to learn C or C++ programming. Has a very nice DOS
developer's environment.

Sells new for $90.00

Your price: $25.00 obo

2) Info Magic Linux CD Set: This a VERY complete Linux package and
includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4
and more. Has XFree86, full HOWTO set, and much, much more. This is a
>6< CD-ROM set! Not that the CD case itself is damaged, but the CDs
themselves are just fine. There are many Ham packages (mostly packet)
that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $20.00 obo

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was
my old PBBS machine and was removed from service to be replaced with a
newer, faster board. Works great, I just have no use for it any
longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $40.00 obo

```
*****************************************
* SPECIAL ONE FOR ALL DEAL: *
*---------------------------------------*
* Take all 4 items for only $70.00 USD!!! *
*****************************************

*********************
* SPECIAL NOTES *
*********************
```

1) All prices include shipping by my choice of carriers to the US and Canada. Shipping to other places or by special means will be added at cost.
2) I prefer to sell as a package and package offers will take precidence.
3) All prices in USD. Payment by money order, certified check, or person check OK. Personal checks will be held until they clear the banks.
4) Your E-Mail or Packet note will hold the items for up to 1 week while I wait for payment to arrive.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below. Please include your name, packet and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Terms are as follows:

All items are for sale AS-IS, all sales FINAL. Please feel free to make an alternative offer. I reserve the right to decline any offer.
You can pay me in
advance; when I receive your payment (personal cheque is OK), I ship to you. COD is fine also.

For more information, contact: Christopher Edmonds - edmondsc@fiu.edu
==========
Motorola Radios & Accessories (see below for more info)

$400 shipped for the lot

qty 1 HT50 154.6 MHz
qty 4 HT90 154.6 MHz
qty 3 HT90 154.57 MHz
several partially assembled HT90s and HT50s

qty 1 NTN4864B charger
qty 6 NLN7646A charger
qty 6 NTN4864A charger

qty 14 NLN7434A & similar batteries
qty 1 NTN5453A battery

qty 13 BNC whip antennas various lengths
qty 1 HT50 screw in antenna

I would like to sell all this together if possible. The chargers are in decent cosmetic shape, some have marker writing on the front. The radios are somewhat more beat up. All of the radios were used for data transmission, all have had the accessory jack removed. Some have a short coiled cord with a strange connector in place of the jack, some have nothing at all here. I have tried most of them, however, and they all seem to function anyway. The condition of most of the batteries is unknown; I charged up a few to test the radios, that's it. Because of the condition of this equipment, I offer no guarantees on it.
==========
HP 1222A Oscilloscope $100 OBO + shippping

Not working, possible problem with sweep generator. When you press
the beam find button, you can see the beam sitting there in the
middle.

Matt,

Welcome to the hobby!

I think that the only rig currently available that has HF, 6M, and 2M is the IC-706. There is an earlier version that is now discounted to around the kilobuck range if you can find it, or look on rec.radio.swap for a used one. I'd go for the latest one, though, and get all the fixes.

The other choice is a decent HF rig and transverters, but your budget doesn't leave much wiggle room for that route. I operate on HF with one rig, on 6M with a rig that is HF+6, and on 2 with a nice 2M rig. I've been accumulating this stuff for quite a while, though. I think the 706 is a very good choice for your needs.

Look at the weak signal portions of the VHF bands. They are a lot more fun than the repeaters.

Hello:

I have the following items that I no longer need and are gathering dust around the house and offer them for sale:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Your price: $25.00

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Your Price: $20.00

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $45.00

4) Kenwood TM-2550A 2m FM mobile transceiver. This radio was bought used and I have used it for packet (no mods done by me). I have the mobile mounting bracket and original Kenwood mic. No manuals. Radio works very well with ~48 watts on high (rated at 50 watts) and ~7 watts on low (adjustable). The only problem I know of is that the LCD display has one "flakey" digit (the right-most)... If you press down slightly on the top of the case, the digit works perfectly, but otherwise the top two horizontal segments do not show. I solved this on by clamping the radio in its mobile bracket which put enough pressure on the case to make the digit work!

Your Price: $145.00

5) MFJ-1270B packet TNC. This is a packet only TNC (no AMTOR and such) that supports 1200 bps for VHF/UHF and 300 bps for HF work. Works

perfectly. I have done a few mods on this unit: True DCD for open squelch operation; Added by-passing to reduce RF noise from the TNC; Upgraded chips to allow 19,200 bps on the serial port. I have been using this TNC for a local node with no problems. The original MFJ EPROM will be put back in the TNC. I have the manual and wall plug power supply. New battery installed about a year ago.

Your Price: $85.00

6) Channel Master 9512A light duty rotor. This is a 3-wire TV antenna type light duty rotor. I have used it to turn a 4 element 2m quad with no problems. THIS ROTOR IS NOT SUITABLE FOR LARGE ANTENNAS! Complete with the rotor and control unit. No wire provided. Not that you will need to provide the bolts and straping for the rotor to mast connection as the clamps are missing. (the clamps for the rotor to the antenna are there).

Your Price: $35.00

PACKAGE DEALS!

1) Take all 6 items for $325.00... You save $30.00!

2) Take the Kenwood and MFJ-1270B for $220.00... You save $10.00!

TERMS

1) All prices include shipping by my choice of carriers to the US and Canada. Shipping to other places or by special means will be added at cost.

2) I prefer to sell as a package and package offers will take precidence.

3) All prices in USD. Payment by money order, certified check, or person check OK. Personal checks will be held until they clear the banks.

4) Your E-Mail or Packet note will hold the items for up to 1 week while I wait for payment to arrive.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below.

I can provide the E-Mail addresses of people to whom I have sold items in the past if you want to "check my references".

Thanks!

I have the following two telephone modems for sale:

1) Smart One 2400X modem. This is a 2400 bps external modem. Uses the Hayes command set. Complete with wall plug power supply and manual.

Asking $25.00 shipped to the US

2) Atari SX212 modem. This is a 1200 bps modem made by the old Atari Corp. It has both a standard RS232 25-pin connector _AND_ the Atari 8-bit SIO port. This modem, when used with the right software (Express or BobTerm) will direct connect to your Atari 8-bit computer! There is NO other 1200 bps modem that will do this!

Asking $25.00 shipped to the US

Will sell both modems for $40.00 shipped to the US.

Will consider offers.

Take Care & 73

Marty, you can buy brand new US Robotics 14.400 modems
for $17.00 each. I can't even give my 2400 baud
modems away. Want some 1 meg ram simms? I have
bags of them. Progress is great but....

Hello:

I have the following items that I no longer need and are gathering dust around the house and offer them for sale:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Your price: $20.00

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Your Price: $15.00

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $40.00

4) Kenwood TM-2550A 2m FM mobile transceiver. This radio was bought used and I have used it for packet (no mods done by me). I have the mobile mounting bracket and original Kenwood mic. No manuals. Radio works very well with ~48 watts on high (rated at 50 watts) and ~7 watts on low (adjustable). The only problem I know of is that the LCD display has one "flakey" digit (the right-most)... If you press down slightly on the top of the case, the digit works perfectly, but otherwise the top two horizontal segments do not show. I solved this on by clamping the radio in its mobile bracket which put enough pressure on the case to make the digit work!

Your Price: $135.00

5) MFJ-1270B packet TNC. This is a packet only TNC (no AMTOR and such) that supports 1200 bps for VHF/UHF and 300 bps for HF work. Works

perfectly. I have done a few mods on this unit: True DCD for open squelch operation; Added by-passing to reduce RF noise from the TNC; Upgraded chips to allow 19,200 bps on the serial port. I have been using this TNC for a local node with no problems. The original MFJ EPROM will be put back in the TNC. I have the manual and wall plug power supply. New battery installed about a year ago.

Your Price: $70.00

6) Channel Master 9512A light duty rotor. This is a 3-wire TV antenna type light duty rotor. I have used it to turn a 4 element 2m quad with no problems. THIS ROTOR IS NOT SUITABLE FOR LARGE ANTENNAS! Complete with the rotor and control unit. No wire provided. Not that you will need to provide the bolts and straping for the rotor to mast connection as the clamps are missing. (the clamps for the rotor to the antenna are there).

Your Price: $30.00

PACKAGE DEALS!

1) Take all 6 items for $290.00... You save $20.00!

2) Take the Kenwood and MFJ-1270B for $195.00... You save $10.00!

TERMS

1) All prices include shipping by my choice of carriers to the US and Canada. Shipping to other places or by special means will be added at cost.

2) I prefer to sell as a package and package offers will take precidence.

3) All prices in USD. Payment by money order, certified check, or person check OK. Personal checks will be held until they clear the banks.

4) Your E-Mail or Packet note will hold the items for up to 1 week while I wait for payment to arrive.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below.

I can provide the E-Mail addresses of people to whom I have sold items in the past if you want to "check my references".

Thanks!

Take Care & 73

Now that the radio has been around for awhile, what do the owners of the Kenwood 870 think of them...? Are they worth the $2300 price tag?

How does the quad conversion receiver do with the built-in filtering?

Opinions appreciated. Please reply here in the News Group...I've been having some problems with my e-mail.

Thanks.

Robert

Reply:

Robert:

I am crazy about my TS-870S. It's a great rig. I've had many
Kenwoods, as far back as a TS-520S and TS-440SAT, and more recently
the TS-940SAT. In my opinion the receiver in the 870 is just as hot
or better than in the 940. It does take some getting used to and
I really wish there were more intermediate settings on the DSP, but
all in all, it is a great rig and good value for the money, IMO.

Thinking about getting one?

Regards,

Dan

The receiver is very poor for high speed cw under noisey band conditions due to the
ringing filters, distorted audio and poor dsp response. I took mine back. For those who are less demanding, They'll never know the difference.

Steve

Hi Steve!

I believe the TS-870 has no provision for upstream (RF freq) xtal or mech filters but depends totally on DSP at a very low IF freq. That seems a bad approach, and was commented on in the QST review of the radio (Feb 1996 issue)

Curiously, the TS-570 does allow adding a narrow CW xtal filter, which is a big improvement over not having one. In this sense the 570 is better than the 870, even tho it has fewer features.

When they have the technology to do DSP at true RF IF freqs, then is my replace mech/xtal filters: Not yet!

Phil

I'm looking for a Heathkit SB-200 or a Yaesu FL-2100b or z HF Amplifier
in repairable or good condition. My price range is about $300 for a
good working amp. I also need it shipped to Roseville California
(near Sacramento).

I see UPS is still on strike so...

US Mail Fourth class mail is $11.96 for 45 lbs. all the way across
the USA. Insurance is $3.40 for $300.00.
So shipping & insurance should be about $15.36 or less. The max weight
for US Mail fourth class is 70 lbs.

I can send you a postal money order.

Let me know what you have and how much you want.

mailto:rtwodtwo@cwnet.com

Drake R8A communications receiver for sale.
100 kHz-30 MHz, synchronous detection, noise blanker, passband tuning, preamp/attenuator, universal power supply, dual clocks/timers, five excellent bandwidths and six receiving modes (AM, FM, USB, LSB, CW, RTTY). 440 memory channels plus two VFOs make this a very flexible receiver. Rarely used, in brand new condition with box and all materials. Selling due to lack of use. This is a very fine radio. It needs to be put to use!

Also for sale is a Dymek DA100E outdoor active antenna. A fine unit with a stainless steel whip and 3-step attenuator and 3-step impedance matching unit.

Prices:
R8A: $900.00/OBO
DA100E: $100.00/OBO

I have the following for sale:

1) Kenwood TL-922a amplifier, w/10meter mod. Absolutely beautiful condition. Full output. Have original box, manual, service manual. This amplifier is very nice and
NO I DO NOT SMOKE!!!!!!!!
I got a new amp and do not need 2 or I would keep it.
Asking $1,100 or I will take offers.

2) Kenwood TS-120s. This radio is in excellent condition and works very well. Has the large mobile bracket, hand mic, and power cord. Asking $350 or offers.

3) Gap Titan DX antenna. I just put up another tower and wife says something has to go, so this antenna is it. It is an excellent 80-10 meter vertical that I have been very happy with. The antenna is 4 months old and is still on its ground mount. I will bring it down and disassemble it for shipping. Asking $250.

Thanks for reading my post and reply to me at the E-mail address below.

Motorola Radios & Accessories (see below for more info)

$400 shipped for the lot

qty 1 HT50 154.6 MHz
qty 4 HT90 154.6 MHz
qty 3 HT90 154.57 MHz
qty 1 HT50 154.6 MHz (spkr & mic missing from faceplate)
qty 1 HT50 154.6 MHz (top is cracked up, spkr but no mic)
qty 1 HT90 154.6 MHz (spkr & mic missing from faceplate)
qty 2 HT90 shells (body only, no faceplate) one new
in plastic, one used

qty 1 NTN4864B charger
qty 6 NLN7646A charger
qty 6 NTN4864A charger

qty 14 NLN7434A & similar batteries
qty 1 NTN5453A battery

qty 13 BNC whip antennas various lengths
qty 1 HT50 screw in antenna

I would like to sell all this together if possible. The chargers are in
decent cosmetic shape, some have marker writing on the front. The radios
are somewhat more beat up. All of the radios were used for data
transmission, all have had the accessory jack removed. Some have a short
coiled cord with a strange connector in place of the jack, some have
nothing at all here. I have tried most of them, however, and they all
seem to function anyway. The condition of most of the batteries is
unknown; I charged up a few to test the radios, that's it. Because of
the condition of this equipment, I offer no guarantees on it.

349. NJ Area Hamfest Tax Collectors

Newsgroup: rec.radio.amateur.swap
Date: 1997-09-07 00:00:00 UTC
From: W2CE <W2CE@prodigy.net>
Message-ID: <3413320D.59D2@prodigy.net>
Source record: 10738
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.swap

I have heard recently that 2 men have been attending NJ Hamfests claiming to be State Tax Agents. Several aspects of this operation indicate that this may be a hoax.

I would urge all hamfest sponsors to contact the State Police immeiately upon eeing these people arrive. If they are truely State employees they will have no trouble meeting the police.

More likely they will run and you will need to record a license plate number for the poice to trace.

Why do they seem suspicous ? Because they are asking to be paid your sales tax in advance on merchandise you have not yet sold and they are providing you with their own estimate of its value and tax. They tell sellers to apply for a refund of what they have not sold.

KB8EE's 10 Minute ID'er. A software id'er written for Windows 95/NT only.
This program will not work in Windows 3.1!

The id'er allows you to display text of your choice in a window that also
displays the current time of day in am/pm, gmt, military(24 hr) or zulu.
The window also displays the time remaining until ID time. If the form is
minimized the time remaining is displayed on the task bar.

The current time, and ID times can be announced through your sound card
if you so desire.

Try it for free.

A base 64 decoder such as SJHb64 will decode it.
Just save all the parts into one file and use the decoder.

Barry

Excuse me, but do you mean Ham Swap-Meets? A Ham-Fest would be more like a big yearly convention, which is not what you seem to be talking about. I don't mean to nit-pick. I'm just trying to understand what you meant since NJ used to be my home state and I still have ham friends there.

> claiming to be State Tax Agents. Several aspects of this operation

(Group rec.radio.amateur.misc removed from headers to avoid unwanted mailings.)

NJ State Troopers actually, but if you want to catch them in the act, the municipal PD would more likely have jurisdiction and be quicker to arrive, unless it is outside of the city limits. Event authorities should know who to call. Do they have security guards at NJ ham events?

> immeiately
> upon eeing these people arrive. If they are truely State employees they
> will have no trouble meeting the police.

Agreed... they also shouldn't have a big problem if security politely detains them until the authorities arrive. :)

> More likely they will run and you will need to record a license plate
> number for the poice to trace.

Unless security detains them.

> Why do they seem suspicous ? Because they are asking to be paid your
> sales tax in advance on merchandise you have not yet sold and they are

NJ Sales Tax is always based on the price you charge for an item, NEVER on some arbitrary estimated market value. Also NJ Sales Tax is a fixed percentage.

If they are doing as you said, they are definately imposters and I'd detain them, by force if needed.

I've forwarded a copy of this to Bob Shelton, a friend of mine who is a retired Judge from New Jersey and an experienced extra class ham. He may

be interested in this bit of news. I'm also sending a copy to Amateur Radio Newsline, in case they want to contact you and/or include an advisory to NJ hams about this in one of their upcoming weekly reports. Besides, these alledged crooks may be working more than one state.

375. Wanted: Crystals for Maxon CP-0510-P

Newsgroup: rec.radio.amateur.swap
Date: 1997-09-14 00:00:00 UTC
From: richardb@evansville.net
Message-ID: <341b67f2.8168006@204.120.16.3>
Source record: 10667
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.swap

Hello

I'm looking for crystals to put in a Maxon CP-0510-P (I think
that's the model) handheld radio.
This is for some radios used at a local business here, and I'm
unsure what frequencies these are on now, but I'm sure they are in an
unlicensed business band. The radios were purchased with three
frequencies set, and have a fourth position open.

Getting to the point:
Where is a good source for these crystals?
(Well-known and on the net preferred, but whatever...)
Do these require "Maxon-type" crystals, or does one fit all?
(No, I wouldn't recognize a crystal if I sat on it...)
Anyone have an idea how to replace the crystals in these
things? We took the battery pack off the back, and found a flat metal
plate with several screws holding it in. Do we remove it to reach the
crystals? Go in another way? Am I braindead, and this radio not use
crystals?

Any help would be greatly appreciated!
Rich

I inherited an antique Hallicrafters SX-28 "Super Skyrider" receiver.
Not being a ham, I realize that I'll never use it for anything, so I've
finally decided to try to find it a good home.

For the uninitiated, the SX-28 is an antique shortwave receiver with
enough dials on the front to run a nuclear power plant singlehandedly,
and its construction is sturdy enough to do a tank proud.

I don't know exactly how old it is, but the manual (which includes
full schematics), is dated November 1, 1943. The front cover says
"frequency range - .55 to 43 megacycles."

Part of the tuning knob is broken off, but the unit seems otherwise
to be in excellent condition. All the dial/knob captions are like new,
the glass in front of the dials is intact, and the whole case is in prime
shape. My uncle must have really taken care of it; If you didn't
know, you'd never guess how old it is just by looking.

I don't really know how to use an SX-28, but when I plugged it in,
I heard shortwave stations, even without an antenna attached. So
it looks like the electronics is all functioning.

It comes with the original manual, and the original separate speaker
and speaker cord (the speaker cord is thicker than the power cord!).

This receiver is obviously obsolete by today's standards, but it may
provide hours of fascination for the right hobbyist.

I've attached a .GIF image from my Quickcam, so you can take
a fuzzy look at it for yourself. The speaker is visible sitting on
top of the receiver.

I'm looking for $300 plus insurance and shipping from the Boston
area, but I'll listen to any reasonable offer. And you have to
promise to give it a good home :-).

Regards,
Mike Gilbert

Just curious, how many people have had cop trouble with that radio, since it loks so much like a traditional scanner, that can pick up police frequencies. It can not, which can be verified on the back of the radio, the frequencies covered are listed there, but a cop could easily give one a hard time anyway.

I purchased this radio from Tom back at the first of the month, and returned it to him. Here's a copy of the email I sent him when I received the radio:

Tom,

I received the Pro 80, but Its not working properly. I have canceled payment on my check to you for $200, and will return the radio to you. When I opened the battery compartment to install batteries, a case scew fell out. At that point I noticed the two case screws on the back were missing completely. Upon powering up the radio, I found the display to be off frequency by 5 khz in the am narrow mode. I receive wwv at 4995, 9995, etc. It appears someone has been inside the radio, and has gotten the alignment off. Send me the address where you would like thew radio shipped, and I'll send it back to you.

Doug

Tom was _very_ reluctant to take the radio back, but I really didn't give him a choice since I did stop payment on my check. I would recommend to anyone considering this radio to check with him and confirm that the radio has been repaired and the case screws found.

I had an ICF PRO-80 for years and the AM/SSB AGC chip gave out; the radio starts squealing on any moderately strong signal.

I replaced it with a Sony 7600G, which, at ~$170, is a much better radio for SW AM and SSB reception. Much more sensitive, and about as selective when the selectable AM sideband feature is accounted for. Wont pick up VHF, but the converter thingy on the PRO-80 was a kludge anyway.

I saved the parts from the PRO-80 and plan to turn it into an RF signal generator someday.

390. Need help on Drake MN2700 Antenna Matchbox

Newsgroup: rec.radio.amateur.swap

391. FS: Heath SB303/401 Pair

Newsgroup: rec.radio.amateur.swap
Date: 1997-09-25 00:00:00 UTC
From: mharton@freedomforum.org
Message-ID: <875198105.24718@dejanews.com>
Source record: 10683
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

For Sale: Heathkit SB303/SB401 Pair. This has been my main rig for 8 years. The two radios work together as a transceiver.

The 303 is solid state and has the 400hz CW filter. The cabinet has some wear, but the front panel is unblemished. It is in great shape electrically.

The 401 is in good shape as well. Its cabinet has more wear than the 303, but like the 303, the front panel is unblemished. It works fine on all bands. I have the original manuals for both radios.

My price for the pair is $250 plus shipping (or pick up. I am in the Washington, DC area.) I would prefer not to sell them separately.

73,
Marcus Harton, nz4e

All:

Several Hams have requested info. about SWAN service and Nets, here it is as of last check in May of 1996.

Boddicker Electric Supply 301-694-6888 7311-V Grove Road Frederick, MD 21704

Stu Morrison K4BOV is the contact.

Also, SWAN Nets:

Sun. 14.250 5PM EST WA9AZK UT
Wed. 14.251 7PM EST K4BOV MD/NY
Thu. 7.235 2PM EST K4BOV MD/NY
Sun. 14.293 2PM EST WB0SNF NE

I'd love to hear if any of this has changed, and how your Net contact and/or Boddicker experience goes.

73, DavidC AA1FA

I have for sale an Icom IC-281H 2M mobile radio. This radio has been mobile about 2 times. The rest of the time it has been my packet radio. I operate packet about 3-5 times a year whether I need to or not.

This radio has the extended receive modification (done by me) only. This opens up the RX capability to 118-135.995 MHz AM RX and 320-479MHz FM RX. Out of the box the radio covers 144-148MHz TX/RX and 440-450 MHz RX.

The radio is in mint, like-new condition and comes with the original box, manual, power cord, hand mike (HM-77) and mobile mounting bracket.

AES is currently closing out these radios for $379, I'd like to get $280 for it.

Please email me if you are interested.

73,
Tim

_·_· _ _·_ _ _· · ·_ ·_ ·_ _ _ _ ··_· ·_

I need your collective "elmer" counsel as I am looking for a solid HF rig
in the process of rebuilding my shack.
The only semi-modern rig with which I am familiar with is the ICOM 735.
What other ICOM, Kenwood & Yaesu rigs are similar that are in the
same $500. and lower used price range?

Key issues:
1. 160-10
2. WARC Bands
3. Better than double conversion receive.
4. General coverage ok, but not necessary - I'll get a shortwave radio!
5. RIT, Notch, Passband helpful (Though I am getting a NIR-10 to 1help
kill QRM and QRN! I needed similar help with the 735.)
6. Quick tx/rx switching for digital modes, pactor, packet, etc.
7. External 12v power supply vs internal supply - preferred, but
not absolutely necessary (I'm planning to use a deep cycle or gel
with float charger - filtered to keep out noise)
8. SSB (usb & lsb), CW (AM or DSB for 75, and FM would be nice with a
transverter for 6, 2, etc. some day)
9. A few memories, nice, but not necessary (not operator memories,
frequency memories :-) Come to think of it ... never mind!)
10. Decent shape, but need not be museum quality.

Thanks for guidance, offers, etc.!

Well the Yaesu FT747 is nice, so is the Kenwood ts440
The 440 is a better radio than the 747, but the 747 is a piece of cake
to use..

PRO-26 "hyperscan" scanner for sale!

For a detailed feature list see the following URL
http://support.tandy.com/support_electronics/doc17/17719.htm
For a GREAT picture go here
http://www.demon.co.uk/javiation/pro26.html

Great scanner in PERFECT condition. No scratches, no scuffs, no marks. No ink worn off the buttons, no logo's worn off the case. Comes with charger (not included at time of purchase) and 4 AA rechargeable batteries (these were not included at time of purchase) and a rubber duck antenna. Has a clip to go on your belt.
Scans 25MHZ to 1.3Gig ALMOST SOLID! It is missing the cell phone freq.'s but I can tell you how to modify it so they can be received. I have 5 pictures and specific instructions on how to do the mod.

It's called a "hyperscan" because when you hit the hyperscan button you can scan through a band... say 155 to 160 MHz at 10Khz steps in about 5 seconds... WOW, you don't miss anything.

Also when you do this kind of a scan, sometimes there are channels that have "garbage" that always catch your squelch, and stop you dead, well you can just hit a button and to "skip" up to 50 of these. Very handy when your scanning a range and there is garbage right in the middle. You can find more stuff faster this way.

up to 200 memory channels in 10 banks... so you can choose to scan 20 channels with the touch of a button. Great when you drive through different areas, and you need to switch over quickly to a different set of freq.'s.

keylock button, so you can stick it in your pocket and not change any settings.

The cool thing about this scanner is you can choose the "mode". Like AM, FM, WFM (wide band FM for listening to radio stations, and even some public service stuff).

It has a attenuation setting that can be set for individual channels, so you don't have to crank you squelch up just because one channel has a little noise. Just hit shift-attenuate on that channel, and the others don't have to suffer.

IT AUTO-PROGRAMS!!!! You give it a bank to work in, and give it a range to scan, and when you come back.... It has recorded all frequencies that have made any noise since you left. This is especially handy with a VOX

(voice activated) small hand held recorder (which i will include for another $40 dollars with charger and a few micro-tapes).

I will include TONS OF PAGES of secret freq.'s that I have discovered (FBI, CIA, ATF... etc).

This is a scanner for "the big dogs". Nothing wimpy about it.

I bought it new for 450 + tax + charger + batteries.
Will sell for $375.00 shipped UPS ground at my expense ($40 bucks more with the micro-VOX recorder, charger and tapes, i'll even throw in the batteries)
INCLUDES MANUAL!!!!!!
INCLUDES DOCUMENTATION FOR THE MOD
Or just look here =>http://w5gb.nmsu.edu/kc5kto/mods/pro26cell.html

I am reminiscing after receiving the latest Swan Net newsletter and would like to acquire a Swan rig again.

I am looking for a rig that doesn't have to be museum quality (I intend to use it!), needs to be at least marginally functional (I'll tinker with it over the winter), must not have been "hacked" (modified, rewired, drilled, etc. - don't care if 3-sided case cover has been poorly painted or is scratched, I can repaint that, the face needs to be reasonably intact)

I want only one of the following, and in this order of preference (from most to least wanted):
750
500CX
500C
350D
Others considered.

Price IS an object! This is to be my toy rig and I have very limited financial resources. Value will be assessed to include the condition of the finals, physical condition, operating condition, shipping cost (I'm in So. NH), etc.

I Also Need A Power Supply (Preference in this order):
Swan 117XC
Swan 117C
Galaxy PSA-300
Galaxy AC-400
Hallicrafters PS-500
Galaxy AC-384

Other Accessories Sought:
WM3000 Wattmeter
FP-1 Phone Patch

Thanks for any offers, or suggestions of sources!

Source record: 10629
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap,rec.radio.amateur.equipment,alt.ham-radio.marketplace

I recently received an HT1000 VHF that I no longer need.

MDL# H01KDC9AA3DN
SRL# 402AWYE803

16 channels
TPL/DPL
Scan
The radio is in great condition.
All the usual stuff. Comes with antenna, Ultra High Cap battery(ntn7144),
and rapid charger.
I do not know the exact value of this radio. I have sold a few UHF HT1000
radios on this group in the $325 to $375 range. Is the VHF model similarly
priced?
I'll take the best offer over $300.
Email if interested.

Dan

Wrong! The Yaesu FT-50RD and the VX-1R support DPL. Even the Yaesu
FRS radio supports DPL. Yaesu calls it DCS, but it's the same thing.

Body handling: HTML body converted to readable text

Just so you know......DPL is only a "Digital Private Line" squelch control. It uses a continuous digital pulse instead of a sub-audible tone to control the audio squelch. It is NOT a audio encryption system. If you have the capability (i.e. a Motorola repeater with DPL) you can use it on the amateur band. You probably won't get any others using the machine unless they have a commercial type radio and have the proper digital code programmed for the repeater.

Subject: Re: T2X purchase
Cc: postmaster@mnsi.net, 5slpq5$1c9@news.avci.net

Jim,

There is no "pulling" here, just the chance for you to set things right. The rotor you sold me as "mint" was a sanatized junker. You knew that when the unit was opened and the motor was replaced.

Read your own words from August 26th. In response to my ad looking for a T2X and in plain English you tell me "...It is 5 years old and only used for contests about 6 times and outside about two days each time". On good faith I sent you $350 and received the rotor. When it failed to operate I opened up the cases and discovered what you had sent me. After failing to get a reply from you I did a bit of digging in the rec.radio.archives. I discovered three of the postings by you dated August 11 stating "...tower is about 11 years old and is in perfect condition, it is topped by a 20 foot heavy duty mast. items that go along with the tower.....Hy-gain/Telex "Tailtwister" rotor and control box".

How do you explain that? Telex confirmed that the unit with your serial number was manufactured in 1985. Where do you get five years? And how do you get "mint" from a unit that has been out in the weather for eleven years? I am sorry, but I don't buy the line that a ham tested this unit for you. If this were true, you would have had him contact me to verify the serial number and his testing.

I will afford you a copy of the bill when the rotor is returned from Telex. This will show you the condition, cost and resources required to repair the unit. The bill will includes the serial number of the rotor you sent me and you can compare it to your records. This will take about two weeks and buy you some time to get the money together. I will continue to persue recovering my money from you until this matter is settled. I am not going to let it slide, it is a matter of principle now. I hope you will take this opportunity to right what happened before it becomes embarrassing for each of us. It is simply not worth $107.....

If you want to discuss this matter further, call me.

Thanks,

Bill

Hello Bill
Thanks for your interest in the tailtwister rotor. It is 5 years old
and
only used for contests about 6 times and outside about two days each
time.
Was mostly used on a 4 element 6 meter beam or three element tri bander.
The rotor is just like new.
My address is James Meyers 5883 E. Galbraith line rd.
Croswell Michigan 48422. Shipping shouldn't be more than about $15.00.
Drop me an email if you want me to hold it for you.
I live in canada but I work in the states and that is my work address.

66 foot Self Supporting Tilt-Over Tower, VERY HEAVY DUTY....
this tower is about 11 years old and is in perfect condition,
it is topped by a 20 foot heavy duty mast.
items that go along with the tower.....
Hy-gain/Telex "Tailtwister" rotor and control box
KLM KT-34 4element HF Beam, about 8 years old...
cushcraft 2m and 220mhz yagis, and 2m AEA isopoles...
hundreds of feet of belden 9913 coax, rotor control wire etc...
I am moving and can't take this with me, this is all being
offered at the sacrafice price of $800.00 Canadian...
however, you must take it down, and remove it by August 30th.
if your interested give me a call at 519-542-8529 evenings, or
leave a message at 810-679-3535 anytime.
The tower is located at 874 Rosedale Drive in Sarnia, Ont.

73,
Jim Meyers NM8X/VE3
e-Mail nm8x@mnsi.net

Jim,

Perhaps I wasn't clear enough for you.

You advertised the rotor to be five years old. It was manufactured and
purchased eleven years ago.

You claimed in your e-mail to me that you used the rotor only occasion
in a portable mode for contests. In three of your Newsgroup ads you
state that it was used in the heavy duty tower for eleven years to turn
a HF and VHF yagis.

You claimed in your e-mail to me that the rotor was in mint condition.
The brake wedge was locked to the housing by corrosion. The lower ball
bearing race was damaged by rust from water damage. The two upper ball
races were severely worn. Telex has inspected the rotor and confirmed
the age and serial number to be true. Telex also confirmed the serial
number and date of replacement motor previously installed.
Telex described the condition as poor. To make the unit functional they
will be replacing the brake solenoid, wedge-slide, lower housing and
all ball bearings.

Now you tell me a friend checked it out for you, yet you don't say who.
And, to top it off you try to make me feel foolish with your comment
about freezing in shipment.

I am going to offer you an opportunity to correct what you have done to me. I have paid Telex $107 to rebuild the unit. I expect you to send me a money order for $107 within five working days. Or, you may send me a $479 money order for the original purchase price of $350, plus $22 for shipping and $107 for Telex, and I will return the rotor to you.

If you elect not to right this matter, I will seek damages, legal fees and costs to recover my original purchase and the repairs from Telex. According to your State Attorney General's Office your nine postings and e-mails place this matter within the statutes of interstate mail fraud. From my attorney's advise I am fully confident that your Small Claims Court will award on my behalf. I consider your actions to me to be a personal affront and I will devote whatever time and money it takes to pursue recourse. Please understand clearly, if I let you get away with this I will eventually become vulnerable to everyone I do business with. I hope you don't let this happen over $107.

Sincerely,

Bill Cotter

>nm8x "Jim"
>
>
>
Jim,

I have sent you repeated requests to contact me regarding this purchase. I feel that you deceived me with the business of the rotor being 5-years old. I found your add suggesting that it was over 10yrs old as the serial number indicates. I expect you to contact me within 5-working days or I will pursue taking legal action against you.

Bill

Jim,

I am disappointed with the T2X purchase I made from you based on your description of: "It is 5 years old and only used for contests about 6 times and outside about two days each time. Was mostly used on a 4 element 6 meter beam or three element tri bander. The rotor is just

like new."

I sent you an e-mail below expressing my concern of the age of the unit versus your statement above.
You did not reply and I am not surprised.

Since that time I was been unable to get the T2X to operate. With all connections properly made and a TELEX service technician on the line, the problem was traced to the rotor unit itself. I removed the six bolts and split the motor housing to discover the entire bottom half of the unit was corroded and the lower ball bearing race was rusted beyond repair. The brake wedge was frozen in place and would not allow the unit to turn. The upper races were worn sufficiently to lead me to believe this unit was worn well beyond the paint job. The fact that a new motor was installed tells me that the condition should be no sup rise to you, if in fact you are the original owner.

I have sent the unit to TELEX for a total rebuild at their suggestion. The cost will be $107 including shipping. I would appreciate a check for $107 to restore this unit to the mint condition that you originally described it to be in. If you wish to discuss this matter further, feel free to call me at home 606-887-5563 or at work 606-323-6474.

Thanks,

Bill N4ALG

Jim,

Received the rotor Friday afternoon when I got home. Appeared to make it OK, you packed it quite well. I haven't tried running it, but will do that today.

I was a bit disappointed in the age of the unit. From our e-mail correspondence, you led me to believe it was only five years old and in good condition. The serial number indicates that it is almost 12-years old (manufactured in 1985). I hope the mechanical condition is as stated. I suppose I'll find out when I open up the housing. The price to have a T2X rebuilt is very reasonable and I would expect this rotor to be in as good a condition as a rebuilt unit. If what you said about using it only a few times and never having it permanently mounted is true, then it should be in mint condition internally. Otherwise, I feel you and I will need to renegotiate the deal to reflect the true age and condition.

Thanks,

Bill

Yaesu has finally started to offer DPL tone on amateur equipment. I
think the only one so far though is the FT50 dual band radio.
Hopefully others will soon follow suit.

If you want a truely private repeater, DPL is, for now, the way to go.

"Dave Clausen" wrote:

i agree with bill cotter. after reading all email messages
that the two of them had sent to each other, found that james had indeed lied
about the rotor. a rotor doesn't
leave one house in mint shape and five years old and show up in another house,
12 years old and beat up..

james do the right thing!! cause if not im sure it wont be forgotten and no
one will buy from you again..

Hi Cole and Kathy,
Yes there is a difference. If you are considering using ctcss on your machine, and it is for general amateur consumption, then the only item to use would be a conventional "PL" board. The use of a ''DPL" board would all but eliminate the use of your repeater by most individuals. There are 1000 positive and 1000 negative going "DPL" codes to choose from. Some of the newer ham rigs now are equiped with "DPL." If you don't have a real "lid" problem then your best bet is going to be the use of the former.

For Sale: I have two antenna tuners...

1) Dentron "Jr. Monitor" -- Compact size makes it excellent for QRP or power up to 300 watts. Covers 80 thru 10 meters. Size is about 2 x 6 x 6 inches. Looks like new with manual. Rugged design and built to last. $45 + Shipping on 3 pounds.

2) MFJ-969 Roller Inductor Tuner -- Has built-in 300 watt dummy load and antenna switch. Like new and still in the box. Excellent HF tuner! $110 + Shipping on 6 pounds.

Thanks,

Steve WA9FDZ (ex WB9KEV)

For Sale:

1) Hustler 6BTV all-band (60 thru 10 including 30M) vertical antenna. Used 1 month and then carefully disassembled and put back into original box. No damage, clean, works great. The wife just didn't like it sticking out of the ground in the back yard. $110 + Shipping.

2) Bencher BY-1 iambic CW paddle. Very good condition. $40 + Shipping.

3) MFJ-564 iambic CW paddle. Like new in original box. Chrome plated base, red paddles. $40 + Shipping.

4) MFJ-1272 MYV packet/microphone switch. This accessory allows you to have your TNC and mic hooked to the rig at the same time. A front pannel switch allows you to change between the TNC or Mic wit the push of a button. Also, the 1272 makes it easy to hook your KAM to a Yaesu without any soldering. Includes necessary cables. Like new in original box. $25 + Shipping.

5) B&W "Model 600" Grid Dip Meter. Excellent diagnostic and design tool. In very good condition. Includes coils covering broadcast to 240Mhz, wooden case, manual, spare tube. $45 + Shipping.

6) SURE 488T Noise Cancelling Microphone -- Transistorized hand mic that is FAA certified for Aircraft application (TSO-C58) Frequency response from 200 to 4 KHz. Low impedance dynamic (100 to 220 ohms) element. With Neoprene coiled cord and data sheet. Ready to be wired for your application. Used, but clean. $25 + Shipping.

7) TUBES -- Quantity of 96 tubes. 37 of them are in original tattered JAN boxes. Numbers like: 26C6, 6CZ5, 6DJ8, 6BL8, 6B8, 12K8-Y, 12SK7, 12A6, 12SQ7, 6J5, 12SR7, 6L7, 26V6, 26A6, 26FZ6, 26D6, 6AL5, 12AU7, 6AJ5, 12SA7, 12SJ7, 12SA7Y, and one (1) 4X150D transmitter tube. All tubes have been tested on a TV-7 military tube tester and found to be good. All 96 tubes for $40 + Shipping

Thanks,

Steve WA9FDZ (ex WB9KEV)

From: Nick Thomas <njt@pixeltech.com>
Message-ID: <3475C402.9AF5DE78@pixeltech.com>
Source record: 10574

I have a three tube (8874) model ETO Alpha amplifier for sale. It has the low drive option installed, so about 50 watts drive on any band gives a full 1500 watts out. The amp will deliver 2200 watts++ in to a dummy load. This amp is near mint inside and out. The tubes were replaced about 2 years ago at a cost of nearly $1500. They are Eimac ceramics, very heavy duty, and should last another 15 to 20 years in normal operation. The amp covers all bands 160m-10m including warc. A small mod would have to be done to the choke coil if you wanted to cover 12 meters. This amp will deliver 1500 watts out all day long and night with ease.

Please email me directly if you are interested or have any questions. I will split shipping costs on any sale that requires it, but I would prefer a pick up here in New hampshire.

The price is $1500 FIRM.

Nick AA1LN

Where I work we call it 10-99 (stolen). $400.00 for a brand new radio
with 32 channels? Yea right! The PORTABLES that we just bought were
1100.00/each and they only have 16 channels. Something isn't right.
Hey John what is the serial number?

Sounds like some goverment agency got ripped off
Ht1000 16channel radios retail much less how about $800 or less
You can buy a new Mobile Motorola 1225 20-25 channel alpha readout for $500
new
if anything his price is high
Get you numbers straight.
Doug

I agree that $400 is a little low for this radio, but $1100.00
for a conventional portable is very high. If the portable
has options, such as encryption, or if it is a trunked radio
that price sounds OK. The number of channels alone does not always
give an indication of worth.

It would be good manners if the guy would post a price.

John

Are there any mods for the old Pro-42 scanner that Radio
Shack used to sell? I'm giving away my old one to a friend's son
for x-mas, and want to spiffy it up. I'm mostly looking for how
to remove the gaps it currently has to allow it to cover
everything between 30Mhz and 512Mhz, or at least add 66Mhz -
88Mhz to current freqs without loosing any. And, if it's possible
to increace the scan speed without sacrificing quality.
If anyone has any info on this, please e-mail me.

Remove the second, anti-spamming N from the
end of tdragon in my address to respond,
tdragonn@blarg.net

490. Motorola MaxTrac

Newsgroup: rec.radio.amateur.swap
Date: 1997-11-26 00:00:00 UTC
From: John Gonzalez <radio3@idt.net>
Message-ID: <347C4FC3.657902D9@idt.net>
Source record: 10596
Cross-posted to: rec.radio.swap,rec.radio.commercial-lmr,rec.radio.amateur.swap,rec.radio.amateur.equipment

For all those with nothing better to do, but say that the radio is stolen let me inform you. The MaxTrac was purchased from a Motorola shop on a trade and the guy owed me a favor. The radio itself was built by that shop from NEW PARTS that were aquired when someone went out of business. $400 is not a bad price for a radio that has never been used except for programming. All of this considering that it is 32 Channels and you are getting a DTMF mic., a regular mic., an external speaker, mounting brackets, power cable, and programming cable. If you don't want the radio then fine don't buy it but don't hurt the reputation of an honest post. I posted the article once every few days just in case the server killed the message due to so many other posts in the news group. I f you got it 10 times then I appologise, but that means that you don't read the group offten. I am only trying to sell a radio that I am not using. I thought that this was the purpose of the group!!!

I've seen them used as low as 50.00 Canadian! Lakeshore Electronics
In toronto converts any old maxtrac to be what ever model you want.
Including a 32ch LTR or Motorola type II. Even at their price of
300.00 for the mod You can still do better.

Maybe even do it yourself!

them to any model you want. On Sun, 23 Nov 1997 13:20:11 -0500, Tom

: end of tdragon in my address to respond,
: tdragonn@blarg.net

I doubt you will be able to add much frequency coverage to the '42.
And as for adding 66-88 Mhz(midband)-don't bother....you have to disable
30-54 coverage to get the 66-88-you can't get both at the same time.
Even if you did not mind using 30-54 coverage, the tuned circuts are not
tuned properly for 66-88-in fact not only is the tuning different, but
several parts have different values on a unit designed to operate at
66-88.
Also, in the USA, those freqs are mostly used for TV audio, wireless
mikes, and audio enhancement devices.
Almost all of the above use WFM.
Since the PRO-42 can not receive WFM, you would get a rather distorted
result.

I have come to own AF67 & AF68 transmitters and a PMR6 receiver from
Multi-Elmac and would like to restore them.
As I await their arrival, can anyone provide the list of tubes so I may
begin prospecting for a full set of replacements, please?
Also, copies of manuals for all three would be very helpful!
And ... a power supply!

Kenwood Model TS-930S For Sale
Radio is in Great Condition (still have original manual and boxes)
Picture is Attached
Asking $800+Shipping from Kalamazoo Michigan, USA

Specifications:

Transmitter Range:
---
160 m Band 1.8 ~ 2.0 Mhz
80 m Band 3.5 ~ 4.0 Mhz
40 m Band 7.0 ~ 7.3 Mhz
30 m Band 10.1 ~ 10.15 Mhz
20 m Band 14.0 ~ 14.35 Mhz
17 m Band 18.068 ~ 18.168 Mhz
15 m Band 21.0 ~ 21.45 Mhz
12 m Band 24.89 ~ 24.99 Mhz
10 m Band 28.0 ~ 29.7 Mhz

Receiver Range:

150Khz - 30Mhz

Mode: A3J (USB,LSB), A1 (CW), F1 (FSK), A3 (AM)

Antenna Impedance: 50 ohms
With AT-930 20- 150 ohms (80 - 10 meter)
antenna tuner 30 ~ 100 ohms for 19 Mhz and 24.5 Mhz

Dimensions: 374(14-3/4")W x 141(5-9/16")H x 350(13-13/16")D mm(inches)
Weight with Antenna tuner ~ 18.5 Kg (40.8 lbs)

The TS-930S is a highly sophisticated all-solid state transceiver operating on all Amateur bands between 1.8 and 29.7 Mhz, and a general coverage short wave receiver covering the 150Khz to 30Mhz range. The TS-930S includes many built-in features usually found as extras on other tranceivers. Included are VOX, 100kHz calibrator, RIT, RF attenuator, two VFO's and two effective noise blankers. The TS-930S also includes automatic gain control (AGC), automatic level control (ALC), full - and semi-break-in CW with slidetone, an RF speech processor, speaker, built in AC power supply and an optional built in automatic antenna tuner (which this unit has).
Designed for operation on SSB, AM, FSK or CW, the TS-930S delivers more than 250 watts PEP input. Any complicated electronic device may be damaged if operated incorrectly, and this transceiver is no exception. Please read all

of the operating instructions before putting your TS-930S on the air.

Features
160-10 Meters, with 150 Khz - 30 Mhz General Coverage Receiver
Excellent Receiver Dynamic Range
Dual Mode Noise Blanker ("Pulse" pr "Woodpecker")
SSB IF Slope Tuning
CW VBT and Pitch Control
IF Notch Filter
Built-in Audio Filter
All Sold State, 28 Volt Operated Final Amplifier
Automatic Antenna Tuner , Built-In
CW Full Break-In
RF Speech Processor

Kenwood Model TS-930S For Sale
Radio is in Great Condition (still have original manual and boxes)
Picture is Attached
Asking $800+Shipping from Kalamazoo Michigan, USA
email: grene@net-link.net

Specifications:

Transmitter Range:
---
160 m Band 1.8 ~ 2.0 Mhz
80 m Band 3.5 ~ 4.0 Mhz
40 m Band 7.0 ~ 7.3 Mhz
30 m Band 10.1 ~ 10.15 Mhz
20 m Band 14.0 ~ 14.35 Mhz
17 m Band 18.068 ~ 18.168 Mhz
15 m Band 21.0 ~ 21.45 Mhz
12 m Band 24.89 ~ 24.99 Mhz
10 m Band 28.0 ~ 29.7 Mhz

Receiver Range:

150Khz - 30Mhz

Mode: A3J (USB,LSB), A1 (CW), F1 (FSK), A3 (AM)

Antenna Impedance: 50 ohms
With AT-930 20- 150 ohms (80 - 10 meter)
antenna tuner 30 ~ 100 ohms for 19 Mhz and 24.5 Mhz

Dimensions: 374(14-3/4")W x 141(5-9/16")H x 350(13-13/16")D mm(inches)
Weight with Antenna tuner ~ 18.5 Kg (40.8 lbs)

The TS-930S is a highly sophisticated all-solid state transceiver operating
on all Amateur bands between 1.8 and 29.7 Mhz, and a general coverage short
wave receiver covering the 150Khz to 30Mhz range. The TS-930S includes many
built-in features usually found as extras on other tranceivers. Included are
VOX, 100kHz calibrator, RIT, RF attenuator, two VFO's and two effective
noise blankers. The TS-930S also includes automatic gain control (AGC),
automatic level control (ALC), full - and semi-break-in CW with slidetone,
an RF speech processor, speaker, built in AC power supply and an optional
built in automatic antenna tuner (which this unit has).
Designed for operation on SSB, AM, FSK or CW, the TS-930S delivers more than
250 watts PEP input. Any complicated electronic device may be damaged if

operated incorrectly, and this transceiver is no exception. Please read all of the operating instructions before putting your TS-930S on the air.

Features
160-10 Meters, with 150 Khz - 30 Mhz General Coverage Receiver
Excellent Receiver Dynamic Range
Dual Mode Noise Blanker ("Pulse" pr "Woodpecker")
SSB IF Slope Tuning
CW VBT and Pitch Control
IF Notch Filter
Built-in Audio Filter
All Sold State, 28 Volt Operated Final Amplifier
Automatic Antenna Tuner , Built-In
CW Full Break-In
RF Speech Processor
Dual Digital VFO's
Automatic VFO Step change
Eight Memory Channels
Fluorescent Tube Digital Display
AC Power Supply Built-In

520. Re: bincancel:8 large binaries:AR1284:@@NCM

Newsgroup: rec.radio.amateur.swap
Date: 1997-12-08 00:00:00 UTC
From: red@redpoll.mrfs.oh.us
Message-ID: <ARMM-Report-1284.a@redpoll.mrfs.oh.us>
Source record: 10531
Cross-posted to: alt.retromod,alt.sys.mac.newuser-help,comp.sys.mac.misc,rec.collecting.coins,rec.collecting.sport.football,rec.music.classical.contemporary,rec.radio.amateur.swap,rec.radio.swap,rec.sport.boxing,sci.astro.amateur

Large binary posts do not belong in unmoderated discussion groups.

Please read this entire message, the Bincancel FAQ, and the complete
report (see below) before following up to or responding to this article.

As a service to, and with the cooperation of, other news administrators,
I run a program that searches for, and issues advisory cancels for,
large binaries in the akr, biz, comp, humanities, misc, news, nz, rec,
sci, soc, talk and uk hierarchies.

I have issued 8 cancels for large binary files (average size 269,653
characters - total size 2,157,226 characters) posted to 8 different
unmoderated discussion groups in the comp, rec, and sci hierarchies
(with cross-posts into alt groups) as follows:
2 sci.astro.amateur
1 rec.sport.boxing
1 rec.radio.amateur.swap
rec.radio.swap
1 rec.music.classical.contemporary
1 rec.collecting.sport.football
1 rec.collecting.coins
1 comp.sys.mac.misc
alt.binaries.sounds
alt.sys.mac.newuser-help

The unnumbered newsgroups in the list are not separate posts, but
are cross-postings of the articles represented by the preceeding
numbered items. Cross-posting may lead to cancels in non-targeted
groups as a consequence of the way cross-posts work. A cross-posted
article has only one Message-ID. When it is canceled from one
group it is canceled from all groups.

This pointer is being posted to each affected group listed above,
with the exception of alt.binaries groups. Follow-ups are directed
to news.admin.net-abuse.usenet.

If you want to see exactly which file was deleted from a particular
group, read the full report in news.admin.net-abuse.bulletins. The
full report can also be found in news.lists.filters and alt.retromod.
Look for AR1284 in the subject, or, if your reader supports it,
use <URL:news:ARMM-Report-1284@redpoll.mrfs.oh.us>.

The criteria used to search for this batch of large binaries were:
NEWSGROUPS: Unmoderated groups in the akr, biz, comp, humanities,

misc, news, rec, nz, sci, soc, talk and uk hierarchies
(except for comp.binaries.apple2, comp.bugs.2bsd, and
rec.games.bolo)
BINARY: base64, binhex, uuencode, and xbtoa encoded files, etc.
SIZE: > 100,000 characters [(size * (# of parts - .5)), if multi-part]

For more information about binary cancels, see the Bincancel FAQ,
<URL:http://www.southcom.com.au/~geniac/binfaq.html>.

Please direct public feedback to news.admin.net-abuse.usenet and private
feedback to red@redpoll.mrfs.oh.us. In the interests of preventing
cross-posted flame wars, please honor the followup-to header and do
not cross-post your reply to multiple groups. Thank you for your
cooperation.

Best wishes,
Dick

I have a Kenwood TH-79 in excellent condition with KSC-14 rapid charger and SMC-34 speaker mic. I have always used the protective softcase on the radio. I also have two 9.6v rechargeable battery packs. Have original boxes and manual. Will sell as package for $435 shipped CONUS.

I also have a Mirage/KLM B-1030G 2meter all mode amplifier. 10 watts in gets 300 out! Can be driven w/as little as 250 mW. Has preamp. HRO sells this unit for $649.95. Works great. With manual. Will sell for $480 shipped CONUS.

Please email me if you are seriously interested in either of these items.

Hello all... I am looking for an automated repeater controller. I want something that still has tech support and parts available to anyone and everyone. If you have something please let me know asap!!!!!!!
Here is the things i'd be willing to trade:

ic-727 hf + 6meters Hardly been used!!!!

ald 24t vhf and uhf mobile (actually a commercial radio) Works great on amateur bands!!

ic-02at vhf ht

as well as some other misc parts.

if you have something of this nature, let me know and even if your not interested in trading maybe we could work something out. If what you have is not of equal value, i either need $ compensation, or other equip compensation.

Thanks de Rod Ekholm Jr. kc7aad@kc7aad.#ewa.wa.usa.noam

Hi, I have a Kenwood 3-watt 2M HT for sale.

It has a Ni-Cad battery pack, "rubber duckie" antenna, manual, and a carry cord. The keypad is a little faulty, but otherwise is in good working order.

I will throw in a repeater directory from the ARRL as an add-in.

Name your price. Thanks. Tom.

For Sale:

Like new Cushcraft R-7000 vertical antenna. Used 9 months and then taken down, when I moved. No place to put up at the new QTH, so need to liquidate. I have done all of the hard work by tuning and marking the antenna so that all you need to do is put it on a pole and you're ready! It's in 3 sections now. Would prefer a local (Dallas, TX) sale, but will consider shipping.

Worked great on all HF bands 10-40. I have the manuals. Asking $300 plus shipping.

73,
Glen Kitto
AC5OJ

Greetings,

I have an ICOM IC-251A that has be tuned up ICOM. Comes with the manual, new desk microphone, and an IC-SM-5 desk microphone. Only $485 Shipped.

KENWOOD TS-520SE with hand microphone,original manual and carton. Excellent shape. Covers 10-160 meters minus WARC. Only $350 shipped.

KENWOOD TH-77A 2/440 Dual-Band Hand Held. Checked by Kenwood recently. Modified for extended transmit and recieve, aircraft/2m/440/800mhz. Includes KSC-7 Desk Charger, BT-6 Battery Case, Rechargeable Battery, orginial manual, container, and modification sheets. Shipped to your door for $295.

VHF ENGINEERING PA140/10 2 meter VHF Amplifier. Large heat sinks. No manual, obtained in a trade. Only FM mode. Shipped for $125.

KANTRONICS KAM PLUS, with Host Master II+ software, only $275 Shipped. This is my second KAM and very little use. MINT condition.

Radio Shack DSP-40 Digital Signal Processor, New in Box, Shipped for $60. One opened, used in excellent condition for $45.

TUCKER T-1000 300 watt Antenna Tuner, (same as Vectronics VC-300DLP), shipped at $120.

Looking for an HF AMP for 10-160 to include WARC/MARS. Will trade towards and depends on the model and age, include $$$ for the difference. Will consider 80A/B and Alpha amps -

Also looking for ICOM IC-706 radio with or without separation kit.

Long before oscilloscopes had built in voltage calibration and dual traces, there was the basic scope. In order to quantify the input signal, a voltage reference was required. To generate two traces,an electronic switch was used. It was basically a square wave generator that used the top and the bottom of the square wave as traces #1 and #2.

For collectors of Heathkits or just early electronic equipment, the following items should be of value:

1 Heathkit Voltage Calibrator Model VC-2, with manual,used in mint condition.

1 Heathkit Electronic Switch Model S-2, with manual, used in mint condition.

If you have any interest in the above, let me know. JPG pictures are available for your viewing.

Greetings,

I have an ICOM IC-251A that has be tuned up ICOM. Comes with the manual, new desk microphone, and an IC-SM-5 desk microphone. Only $485 Shipped.

KENWOOD PC-1A Phone Patch Controller with manual and four pin adapter if needed. Good condition, shipped for $60.

KENWOOD TS-520SE with hand microphone,original manual and carton. Excellent shape. Covers 10-160 meters minus WARC. Only $350 shipped.

KENWOOD TH-77A 2/440 Dual-Band Hand Held. Checked by Kenwood recently. Modified for extended transmit and recieve, aircraft/2m/440/800mhz. Includes KSC-7 Desk Charger, BT-6 Battery Case, Rechargeable Battery, orginial manual, container, and modification sheets. Shipped to your door for $295.

VHF ENGINEERING PA140/10 2 meter VHF Amplifier. Large heat sinks. No manual, obtained in a trade. Only FM mode. Shipped for $125.

KANTRONICS KAM PLUS, with Host Master II+ software, only $275 Shipped. This is my second KAM and very little use. MINT condition.

Radio Shack DSP-40 Digital Signal Processor, New in Box, Shipped for $60. One opened, used in excellent condition for $45.

TUCKER T-1000 300 watt Antenna Tuner, (same as Vectronics VC-300DLP), shipped at $120.

Looking for an HF AMP for 10-160 to include WARC/MARS. Will trade towards and depends on the model and age, include $$$ for the difference. Will consider 80A/B and Alpha amps -

Also looking for ICOM IC-706 radio with or without separation kit.

I have the opportunity to buy a near mint Alpha 76PA (3 tube, standard transformer) at a good price. I understand the replacement tubes are expensive and hard to get? The tubes in this amp have hardly been used and show no discoloration and the rubberized chimneys are just like new but I wonder what the average lifespan of them is? Are there any special problems with this amp? Any info would be appreciated as I have to make up my mind in a couple of days.

Thanks

Ed Scissons VE5VX

Kenwood TR-7850 2 Meter Mobile rig for sale:
- 15 memory channels
- Priority channel (one button access)
- Priority channel alert scan
- Memory scan
- DTMF pad
- 7" W x 2.5" H x 9" D
- 45 watt high power (about 5 on low)
- original manual, hand-mic, mount and box.

This rig also has the "standard" type of functions,
one VFO (separate from memories), reverse button,
bargraph S and power meter...
would also make a good packet radio base station.
It is in excellent shape, very clean. $160
plus $5 shipping.

Ed,

The tubes are getting hard to get and new cost about $300 - $400 USD.
Svetlana has started making them but they are in the same price range.

These tubes are not know for their long life. They were short-lived in
commercial practice because of this. They have a short (by amateur
standards) life when used at rated output (less than 2000 hours). Most hams
run them far beyond rated out with the resultant VERY short life. They are
only rated for 500 watts each in PEP service. That says for the 76 PA 1500
watts max. Alot of hams run these amps at 2000+ out, of course they buy
new tubes every year or so...

The 76PA is a very good amplifier. Folks are now converting them to a pair
of 3CX800A7s which have a much longer life span. Check out Dick Byrd's web
page at http://n4uq.home.mindspring.com Lot's of info on Alpha upgrades
here.

Hope this helps.

73, George K8BRW
